part 97— AMATEUR RADIO SERVICE.

RULES AND REGULATIONS

Part 97 | Amateur Radio Service

MARCH 24, 1976

FEDERAL COMMUNICATIONS COMMISSION

This copy of Part 97 of the Commission's Rules and Regulations governing AMATEUR RADIO SERVICE is current as of March 24, 1976.

The Commission will issue revised editions annually or as required. In the interim, all Rule Amendments will be published in the Federal Register.

INFORMATION REGARDING FEES FOR FILING APPLICATIONS IN THE SAFETY AND SPECIAL RADIO SERVICES

The following rules concerning fees and the fee schedule for filing applications in the Safety and Special Radio Services are extracted from Part 1 of the Commission's Rules for the convenience of the users of this pamphlet:

SUBPART G—SCHEDULE OF FEES FILED WITH THE COMMISSION

GENERAL INFORMATION

§ 1.1101 Authority.

Authority for this subpart is contained in Title V of the Independent Offices Appropriation Act of 1952 (31 U.S.C. 483a) which provides that any service rendered by a Federal agency to or for any person shall be performed on a self-sustaining basis to the fullest extent possible. Title V further provides that the head of each Federal agency is authorized by regulation to prescribe such fees as he shall determine to be fair and equitable.

§ 1.1102 Payment of fees.

- (a) Filing fees. Each application or other filing filed on or after August 1, 1970, for which a fee is prescribed in this subpart, must be accompanied by a remittance in the full amount of the filing fee. In no case will an application or other filing be accepted for filing or processed prior to payment of the full amount specified. Filings for which no remittance is received, or for which an insufficient amount is received, shall be returned to the applicant without processing. In the case of multiple applications for which a single check is drawn to cover all fees for the applications, there should be attached to the remittance an accounting sheet or notice stating what fees are covered by the check or money order.
- (b) Grant fees. The applicant shall observe the instructions contained in the notice of grant concerning payment of grant fees. Grant fees shall be accompanied by a transmittal advice identifying the purpose of the check. The duplicate copy of the Commission's notice of grant, which will specify the amount of the fee, will suffice.
- (c) All remittances should be accompanied by a letter, application, rate card, grant fee notice or other document to properly identify the purpose of the fee.
- (d) Where a separate grant fee payment is prescribed in the various services, the fee will be payable within 45 days after grant by the Commission. In the broadcast services the grant fee in assignment and transfer cases must be transmitted by the new licensee immediately following consummation of the transfer or assignment. All grants, approvals, and authorizations

issued by the Commission are made subject to payment and receipt of the applicable fee within the required period. Failure to make payment of the applicable fee to the Commission by the required date shall result in the grant, authorization or approval becoming null, void and ineffective after that date.

- (e) Broadcast Annual License fee. The annual license fee prescribed for broadcast stations must be submitted each year on or before the anniversary date of the expiration date of the station's license. The licensee shall submit the amount of the annual fee together with the station's rate card for the preceding June 1, on which the annual fee is based. (See § 1.1111(a)(6).) Such fee shall be for the twelve-month period immediately preceding the anniversary date on which the fee is payable.
- (1) A new station first becomes liable for the annual license fee at the time program test authority is granted. In the first year, the fee will cover the period from the date of grant of program test authority until the next payment (anniversary) date. (Example: If a station is in operation for seven full months prior to the next payment date, the annual license fee is seventwelfths of the annual rate.)
- (2) Each broadcast station shall pay an annual license fee to the Commission for the period April 1, 1973–February 28, 1975. The fee applicable to the period after December 31, 1974 shall be the fee prescribed in § 1.1111 (a) (6) of this chapter. The fee applicable to the period April 1, 1973–December 31, 1974 is as follows:
- (i) For A'M and FM stations: The annual license fee will be a payment equal to 6.7 times the station's highest single "one-minute" spot announcement rate, but in no event shall the annual license fee for each AM and each FM station be less than \$25.00.
- (ii) For television broadcast stations: The annual license fee will be a payment equal to 3.4 times the station's highest "30-second" spot announcement rate, but in no event shall the annual fee be less than \$100.00.
- (3) Fees applicable to any twelve-month period ending on or before February 1, 1975 must be submitted on or before August 1, 1975. Fees applicable to any twelve-month period ending after February 1, 1975, must be submitted on or before the anniversary date of the expiration date of the station's license as provided above.
- (4) For broadcast stations submitting a fee on August 1, 1975 applicable to the period April 1, 1973—April 1, 1974 or June 1, 1973—June 1, 1974, the rate card on which the fee will be based is that of June 1, 1973. For broadcast stations submitting a fee on August 1, 1975 applicable to the period August 1, 1973—August 1, 1974, October 1, 1973—October 1, 1974, December 1, 1973—December 1, 1974 or February 1, 1974—February 1, 1975, the rate card on which the fee will be based is that of June 1, 1974.
- (5) For broadcast stations paying an annual license fee applicable in part to a portion of calendar year 1974 and in part to a portion of calendar year 1975, the broadcast annual license fee will be prorated between the annual fee prescribed in paragraph (e)(2) of this

section and the annual fee prescribed in § 1.1111(a) (6) of this chapter. A station's annual license fee will be computed by taking the number of months from the anniversary date to December 31, 1974, divided by 12, times the full year annual fee which is required by paragraph (e) (2) of this section, and adding to that the fee computed by taking the number of months from January 1, 1975 to the anniversary date, divided by 12 times the full year annual fee which is required by § 1.1111(a) (6) of this chapter.

NOTE 1: Example: AM station X has a license expiration date on October 1, Station X's highest single "one-minute" spot announcement rate is \$10 as of June 1, 1974 and \$20 as of June 1, 1975. Station X is required to pay an annual fee for the period October 1, 1973-October 1, 1974 on August 1, 1975 and an annual fee for the period October 1, 1974-October 1, 1975 on October 1, 1975. The fee due on August 1, 1975 will be \$67.00. This is calculated by multiplying 6.7, the fee multiplier specified in paragraph (e) (2) of § 1.1102, times \$10.00 the highest single "one minute" spot announcement rate as it appears on the applicable rate card, that of June 1, 1974. The fee due on October 1, 1975 is \$161.00. To calculate this fee it is necessary to prorate the fee based on the portion of the twelve-month fee payment period during calendar year 1974 and that during calendar year 1975. The number of months from October 1, 1974 to December 31, 1974 is 3. The first step in calculating the fee is to multiply 342 x 6.7 x \$20, the portion of calendar year 1974 covered by the fee $(\frac{3}{12})$ times the applicable fee multiplier (6.7), times the spot rate (\$20 here as the June 1, 1975 rate card is used). This portion of the fee is \$33.50. Next it is necessary to multiply 1/2 x 8.5 x \$20, the portion of calendar year 1975 covered by the fee (%12) times the fee multiplier from § 1.1111(a) (6) (8.5), times the spot rate. This portion of the fee is \$127.50. The annual fee equals the sum of the two amounts \$33.50 and \$127.50 or \$161.00.

- (f) Cable Television Annual Authorization fee. The annual fee prescribed in § 1.1116(b) of this chapter for cable television systems must be submitted by April 1 of each year for the preceding calendar year. The fee will be based on the average number of subscribers as set out in § 1.1116(b).
- (1) A new cable television system becomes liable for the annual authorization fee as of the date it begins to charge for service to 50 subscribers or more. In the first year of operation of the system, the fee will be computed based on the average of the number of subscribers being served on the last day of each calendar quarter of operation up to the end of the calendar year. (Example: If a cable system is in operation on the last day of three quarters prior to the end of the calendar year, the average of those three last-day figures is to be used in computing the fee required.) The fee will cover the number of full months of operation until the end of the calendar year. (Example: If a cable system is in operation for seven full months prior to the end of the calendar year, the fee is seven-twelfths of the annual rate.)
- (2) Each CATV system shall pay an annual authorization fee to the Commission for calendar years 1973 and 1974 to be submitted on or before August 1, 1975. The fee for each system shall be equal to the number of subscribers times 6 cents. The number of subscribers

shall be determined by averaging the number of subscribers on the last day of each calendar quarter.

- (g) Applications and attached fees should be addressed to Federal Communications Commission, Washington, D.C. 20554, or to the appropriate FCC field office and should not be marked for the attention of any individual bureau or office. Fee payments should be in the form of a check or money order payable to the Federal Communications Commission. The Commission will not be responsible for cash sent through the mails. All fees collected will be paid into the U.S. Treasury as miscellaneous receipts in accordance with the provisions of Title V of the Independent Offices Appropriations Act of 1952 (31 U.S.C. 483a).
- (h) Receipts will be furnished upon request in the case of payments made in person, but no receipts will be issued for payments sent through the mails.
- (i) Except as provided in §§ 1.1103 and 1.1104, all applications filing fees will be charged irrespective of the Commission's disposition of the application. Applications returned to applicants for additional information or corrections will not require an additional fee when resubmitted, unless the additional information results in a major change in the application; the resubmission will then be treated as a new application required a new filing fee.

§ 1.1103 Return or refund of fees.

- (a) The full amount of any fee submitted will be returned or refunded, as appropriate, in the following instances:
- (1) Where no fee is required for the application filed.
- (2) Where the application is filed by an applicant who cannot fulfill a prescribed age requirement.
- (3) Upon return of an application for renewal of an operator license which is received after expiration of the grace period.
- (4) Where the applicant is precluded from obtaining a license by the provisions of section 303(1) or 310(a) of the Communications Act.
- (5) Where circumstances beyond the control of the applicant, arising after the application is filed, would render a grant useless.
- (6) When applications (accompanied by fees) are filed where not actually required by Safety and Special Radio Services rules (e.g. change of address, pro forma change of corporate name, etc.).
- (7) When construction permit holders and licensees make nonsubstantive correction in license grants within a period of 60 days from the grant.
- (b) Payment in excess of an applicable fee will be refunded only if the overpayment exceeds \$3.

§ 1.1104 General exceptions.

(a) No fee is required for an application filed for the sole purpose of amending an authorization or pending application (if a fee is otherwise required) so as to comply with new or additional requirements of the Commission's rules of the rules of another Federal Government agency affecting the authorization or pending application; however, if the applicant also requests an additional modification or the renewal of his authorization, the appropriate modification or renewal fee must accompany the application. Fee exemptions arising out of this general exception will be announced to the public in the orders amending the rules or in other appropriate Commission notices.

- (b) No fee is required for an application filed by an alien pursuant to a reciprocal radio licensing agreement.
- (c) A receiver model certificated prior to August 1, 1970, and which will continue to be distributed after August 1, 1970, need not be recertificated and no filing or grant fee shall be required for continued distribution provided it will continue to be distributed under the same trade name and model number and with identical circuitry.

§ 1.1105 General rule (STA and waiver).

Except as otherwise provided no filing fee is required for any application or request for special temporary authority (STA) or waiver of brief duration or minor character in any service or for the grant of either an STA or a waiver of brief duration or minor character. Upon the grant of an application or request for either an STA or a waiver of an important character, the applicant will be notified to remit a fee in the following amount for the respective services:

Broadcast services	\$25
Common carrier services	25
Safety and special radio	5
Cable television services	25

§ 1.1115 Schedule of fees for the Safety and Special Radio Services.

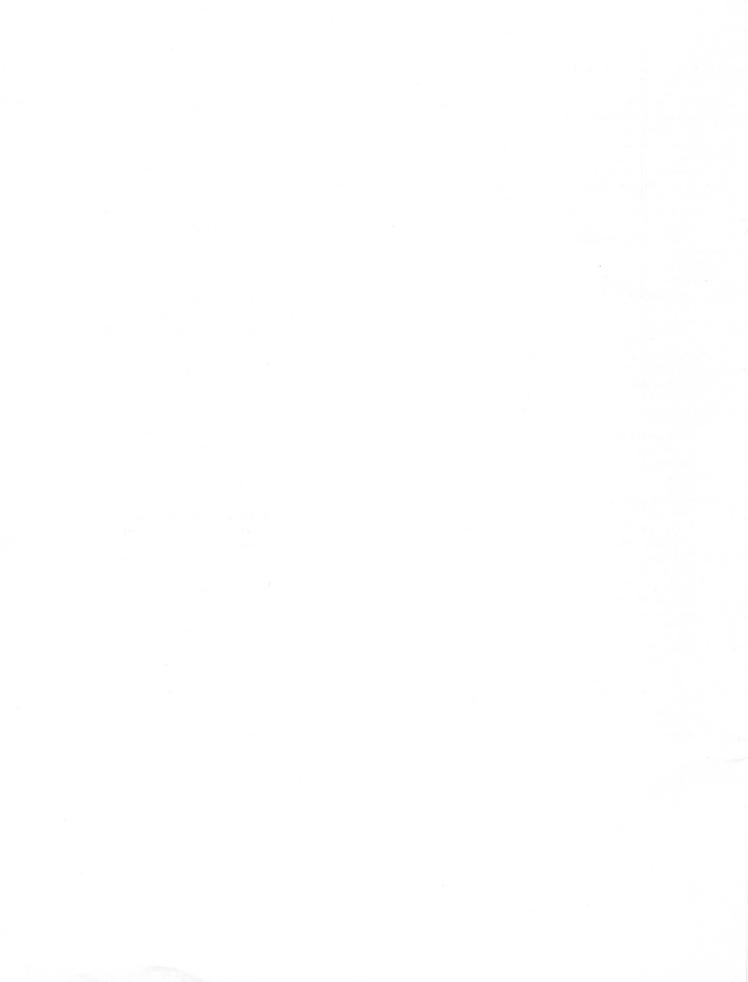

(a) Except as provided in paragraph (c) of this section, the fees set forth in the schedule below shall accompany all formal applications for authorizations filed in the Safety and Special Radio Services:

\$4	Applications for all authorizations except as noted below
10	Ship license that includes interim authorization
	Operational fixed stations using frequencies above
	952 MHz:
	Initial license, 5-year renewal and assignment of
20	license
5	Yearly renewal for stations used in CATV systems
	Stations using frequencies in the band 806-947 MHz
	and providing service on a commercial basis—per
200	channel
200	
	Common carrier public coast stations:
75	Initial license, renewal, and assignment of license
	Amateur service:
3	Modification of license without renewal
	Special call sign (in addition to other applicable
25	fee)
	100/

(b) Except as provided in paragraph (c) of this section, the fee set forth below shall accompany the following application or requests in the Safety and Special Radio Services:

Duplicate license_____

- (c) Fees are not required in the following instances:
- (1) Applications filed in the Police, Fire, Forestry Conservation, Highway Maintenance, Local Government and State Guard Radio Services.
- (2) Applications filed by governmental entities in any of the Safety and Special Radio Services.
- (3) Aplications filed by the following in the Special Emergency Radio Service: hospitals, disaster relief organizations, beach patrols, school buses, and non-profit ambulance operators and rescue organizations.
- (4) Applications filed in the Disaster Communications Services.
- (5) Applications for ship inspections pursuant to the Great Lakes Agreement, the Safety of Life at Sea Convention, and Parts II and III, Title III, of the Communications Act of 1934, as amended.
- (6) Application for Novice Class license in the Amateur Radio Service, applications for amateur stations under military auspices, and applications filed in the Radio Amateur Civil Emergency Services (RACES).
- (7) Operational Fixed Microwave applications filed for Closed Circuit Educational Television Service.
- (8) Applications for Aeronautical Radionavigation Stations, Aeronautical Search and Rescue Stations, and any applications filed by the Civil Air Patrol or its component units in the Safety and Special Radio Services.
- (9) Applications for licenses for aircraft stations to operate with only an emergency locator transmitter (ELT); or an application for only an emergency position indicating radio-beacon (EPIRB) station; or an application for modification of a ship station license to include authority for operation of an EPIRB.
- (10) Amendments to applications for authorizations in the Safety and Special Radio Services if the amended application on an original filing would not have required a higher fee than that already paid for the application being amended. If a higher fee would have been required than that already paid, the applicant will be required to pay the difference upon filing the amendment. If the fee would have been lower, no refund will be made.

APPENDICES

- 1 Examination points.
- 2 Extracts from Radio Regulations Annexed to the International Telecommunication Convention (Geneva, 1959).
- 3 Classification of emissions.
- 4 Convention between the United States of America and Canada, Relating to the Operation by Citizens of Either Country of Certain Radio Equipment or Stations in the Other Country (Effective May 15, 1952).
- 5 Determination of Antenna Height above Average Terrain.

AUTHORITY: §§ 97.1 to 97.313 issued under 48 Stat. 1066, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply 48 Stat. 1064-1068, 1081-1105, as amended; 47 U.S.C. Sub-chap. I, III-VI.

SUBPART A-GENERAL

§ 97.1 Basis and purpose.

The rules and regulations in this part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:

- (a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.
- (b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.
- (c) Encouragement and improvement of the amateur radio service through rules which provide for advancing skills in both the communication and technical phases of the art.
- (d) Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts.
- (e) Continuation and extension of the amateur's unique ability to enhance international good will.

§ 97.3 Definitions.

- (a) Amateur radio service. A radio communication service of self-training, intercommunication, and technical investigation carried on by amateur radio operators.
- (b) Amateur radio communication. Noncommercial radio communication by or among amateur radio stations solely with a personal aim and without pecuniary or business interest.
- (c) Amateur radio operator. A person interested in radio technique solely with a personal aim and without pecuniary interest, holding a valid Federal Communications Commission license to operate amateur radio stations.
- (d) Amateur radio license. The instrument of authorization issued by the Federal Communications Commission comprised of a station license, and in the case of the primary station, also incorporating an operator license.

Operator license. The instrument of operator authorization including the class of operator privileges.

Station license. The instrument of authorization for a radio station in the amateur radio service.

- (e) Amateur radio station. A station licensed in the amateur radio service embracing necessary apparatus at a particular location used for amateur radio communication.
- (f) Primary station. The principal amateur radio station at a specific land location shown on the station license.
- (g) Military recreation station. An amateur radio station licensed to the person in charge of a station at a land location provided for the recreational use of amateur radio operators, under military auspices of the Armed Forces of the United States.
- (h) Club station. A separate Amateur radio station licensed to an Amateur radio operator acting as a sta-

tion trustee for a bona fide amateur radio organization or society. A bona fide Amateur radio organization or society shall be composed of at least two persons, one of whom must be a licensed Amateur operator, and shall have:

- (1) A name,
- (2) An instrument of organization (e.g., constitution).
 - (3) Management, and
- (4) A primary purpose which is devoted to Amateur radio activities consistent with § 97.1 and constituting the major portion of the club's activities.
- (i) Additional station. Any amateur radio station licensed to an amateur radio operator normally for a specific land location other than the primary station, which may be one or more of the following:

Secondary station. Station licensed for a land location other than the primary station location, i.e., for use at a subordinate location such as an office, vacation home, etc.

Control station. Station licensed to conduct remote control of another amateur radio station.

Auxiliary link station. Station, other than a repeater station, at a specific land location licensed only for the purpose of automatically relaying radio signals from that location to another specific land location.

Repeater station. Station licensed to retransmit automatically the radio signals of other amateur radio stations.

Special Event Station. Station licensed at a specific land location for operation related to the celebration of an event, past or present, which is unique, distinct, and of general interest to either the public or to amateur radio operators, for the purpose of bringing public notice to the Amateur Radio Service.

- (j) Space radio station. An amateur radio station located on an object which is beyond, is intended to go beyond, or has been beyond the major portion of the earth's atmosphere. (Regulations governing this type of station have not yet been adopted and all applications will be considered on an individual basis.)
- (k) Terrestrial location. Any point within the major portion of the earth's atmosphere, including aeronautical, land, and maritime locations.
 - (1) Space location. [Reserved]
- (m) Amateur radio operation. Amateur radio communication conducted by an amateur radio operator from an amateur radio station. May include one or more of the following:

Fixed operation. Radio communication conducted from the specific geographical land location shown on the station license.

Portable operation. Radio communication conducted from a specific geographical location other than that shown on the station license.

Mobile operation. Radio communication conducted while in motion or during halts at unspecified locations.

(n) Control. Techniques for accomplishing the prerequisite responsibilities for the immediate operation of an amateur radio station. Must be one or more of the following:

- (1) Local control. Manual control, with the control operator monitoring the operation on duty at the control point located at a station transmitter with the associated operating adjustments directly accessible. (Direct mechanical control, or direct wire control of a transmitter from a control point located on board any aircraft, vessel, or on the same premises on which the transmitter is located, is also considered local control.)
- (2) Remote control. Manual control, with the control operator monitoring the operation on duty at a control point located elsewhere than at the station transmitter, such that the associated operating adjustments are accessible through a control link.
- (3) Automatic control. The use of devices and procedures for control so that a control operator does not have to be present at the control point at all times. (Only rules for automatic control of repeater systems have been adopted. Automatic control of all other types of amateur radio stations must be approved by the Commission on a case-by-case basis.)
- (o) Control link. Apparatus for effecting remote control between a control point and a remotely controlled station.
- (p) Control operator. An amateur radio operator designated by the licensee of an amateur radio station to also be responsible for the emissions from that station.
- (q) Control point. The operating position of an amateur radio station where the control operator function is performed.
- (r) Antenna structures. Antenna structures include the radiating system, its supporting structures, and any appurtenances mounted thereon.
- (s) Antenna height above average terrain. The height of the center of radiation of an antenna above an averaged value of the elevation above sea level for the surrounding terrain.
- (t) *Transmitter*. Apparatus for converting electrical energy received from a source into radio-frequency electromagnetic energy capable of being radiated.
- (u) Effective radiated power. The product of the radio-frequency power, expressed in watts, delivered to an antenna, and the relative gain of the antenna over that of a half-wave dipole antenna.
- (v) System network diagram. A diagram showing each station and its relationship to the other stations in a network of stations, and to the control point(s).
- (w) Third-party traffic. Amateur radio communication by or under the supervision of the control operator at an amateur radio station to another amateur radio station on behalf of anyone other than the control operator.
- (x) Emergency communication. Any amateur radio communication directly relating to the immediate safety of life of individuals or the immediate protection of property.
 - (y) Automatic retransmission. Retransmission of

signals by an amateur radio station whereby the retransmitting station is actuated solely by the presence of a received signal through electrical or electro-mechanical means, i.e., without any direct, positive action by the control operator.

SUBPART B—AMATEUR OPERATOR AND STATION LICENSES

OPERATOR LICENSES

§ 97.5 Classes of operator licenses.

Amateur extra class.
Advanced class (previously class A).
General class (previously class B).
Conditional class (previously class C).
Technician class.
Novice class.

§ 97.7 Privileges of operator licenses.

(a) Amateur Extra Class and Advanced Class. All authorized amateur privileges including exclusive frequency operating authority in accordance with the following table:

Frequencies	Class of license authorized
3500–3525 kHz	Amateur Extra Only.
3800–3890 kHz	Amateur Extra and Advanced.

- (b) General Class and Conditional Class. All authorized amateur privileges except those exclusive frequency operating privileges which are reserved to the Advanced Class and/or the Amateur Extra Class.
- (c) Technician class. All authorized amateur privileges on the frequencies 50.1-54.0 MHz and 145-148 MHz and in the amateur frequency bands above 220 MHz
- (d) Novice class. Those amateur privileges designated and limited as follows:
- (1) The power input to the transmitter final amplifying stage supplying radio frequency energy to the antenna shall not exceed 75 watts, exclusive of power for heating the cathode of a vacuum tube(s).
- (2) Radio telegraphy is authorized in the frequency bands 3700-3750 kHz, 7100-7150 kHz (7050-7075 kHz when the terrestrial location of the station is not within Region 2), 21,100-21,200 kHz, and 28,100-28,200 kHz, using only Type A-1 emission.

§ 97.9 Eligibility for new operator license.

Persons are eligible to apply for the various classes of amateur operator licenses as follows:

- (a) Amateur Extra Class. Anyone except a representative of a foreign government.
- (b) Advanced class. Anyone except a representative of a foreign government.
- (c) General class. Anyone except a representative of a foreign government.
- (d) Conditional class. Except for the representative of a foreign government, anyone:
- (1) Whose actual residence and amateur station location are more than 175 miles airline distance from the nearest location at which examinations are held at intervals of not more than 6 months for General Class amateur operator licenses:
- (2) Who is shown by physician's certificate to be unable to appear for examination because of protracted disability.
- (3) Who is shown by certificate of the commanding officer to be in the armed forces of the United States at any Army, Navy, Air Force, or Coast Guard station and, for that reason, to be unable to appear for examination at the time and place designated by the Commission.
- (4) Who furnishes sufficient evidence, at the time of the filings, of temporary residence for a continuous period of at least 12 months outside the continental limits of the United States, its territories or possessions, irrespective of other provisions of this paragraph.
- (e) Technician class. Anyone except a representative of a foreign government.
- (f) Novice class. Anyone except a representative of a foreign government or a person who holds, or who has held within the 12-month period prior to the date of receipt of his application, a Commission-issued amateur radio license. The Novice Class license may not be concurrently held with any other class of amateur radio license.

§ 97.11 Application for operator license.

- (a) An application (FCC Form 610) for a new operator license, including an application for change in operating privileges, which will require an examination supervised by Commission personnel at a regular Commission examining office shall be submitted to such office in advance of or at the time of the examination, except that, whenever an examination is to be taken at a designated examination point away from a Commission office, the application, together with the necessary filing fee should be submitted in advance of the examination date to the office which has jurisdiction over the examination point involved.
- (b) An application (FCC Form 610) for a new operator license, including an application for change in operating privileges, which requests an examination supervised by a volunteer examiner under the provisions of § 97.29(b), shall be submitted to the Commission's office at Gettysburg, Pennsylvania, 17325. The application shall be accompanied by any necessary filing fee and by a request for the written examination material (see § 97.29(b)).

(c) An application (FCC Form 610) for renewal and/or modification of license when no change in operating privileges is involved shall be submitted, together with any necessary filing fee, to the Commission's office at Gettysburg, Pennsylvania, 17325.

§ 97.13 Renewal or modification of operator license.

- (a) An Amateur operator license, except the Novice Class, may be renewed upon proper application.
 - (b) The Novice Class license will not be renewed.
- (c) The applicant shall qualify for a new license by examination if the requirements of this section are not fulfilled.
- (d) Application for renewed and/or modification of an amateur operator license shall be submitted on FCC Form 610 and shall be accompanied by the applicant's license. Application for renewal of unexpired licenses must be made during the license term and should be filed within 90 days but not later than 30 days prior to the end of the license term. In any case in which the licensee has, in accordance with the provisions of this chapter, made timely and sufficient application for renewal of an unexpired license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.
- (e) If a license is allowed to expire, application for renewal may be made during a period of grace of one year after the expiration date. During this one year period of grace, an expired license is not valid. A license renewed during the grace period will be dated currently and will not be backdated to the date of its expiration. Application for renewal shall be submitted on FCC Form 610 and shall be accompanied by the applicant's expired license.
- (f) When the name of a licensee is changed or when the mailing address is changed a formal application for modification of license is not required. However, the licensee shall notify the Commission promptly of these changes. The notice, which may be in letter form, shall contain the name and address of the licensee as they appear in the Commission's records, the new name and/or address, as the case may be, the radio station call sign and class of operator license. The notice shall be sent to Federal Communications Commission, Gettysburg, Pa., 17325, and a copy shall be kept by the licensee until a new license is issued.

OPERATOR LICENSE EXAMINATIONS

§ 97.19 When examination is required.

Examination is required for the issuance of a new amateur operator license, and for a change in class of operating privileges. Credit may be given, however, for certain elements of examination as provided in § 97.25.

§ 97.21 Examination elements.

Examinations for amateur operator privileges will comprise one or more of the following examination elements:

- (a) Element 1(A): Beginner's code test at five (5) words per minute:
- (b) Element 1(B): General code test at thirteen(13) words per minute;
- (c) Element 1(C): Expert's code test at twenty (20) words per minute;
- (d) Element 2: Basic law comprising rules and regulations essential to beginners' operation, including sufficient elementary radio theory for the understanding of those rules;
- (e) Element 3: General amateur practice and regulations involving radio operation and apparatus and provisions of treaties, statutes, and rules affecting amateur stations and operators;
- (f) Element 4(A): Intermediate amateur practice involving intermediate level radio theory and operation as applicable to modern amateur techniques, including, but not limited to, radiotelephony and radiotelegraphy;
- (g) Element 4(B): Advanced amateur practice involving advanced radio theory and operation as applicable to modern amateur techniques, including, but not limited to, radiotelephony, radiotelegraphy, and transmissions of energy for measurements and observations applied to propagation, for the radio control of remote objects and for similar experimental purposes.

§ 97.23 Examination requirements.

Applicants for original licenses will be required to pass the following examination elements:

- (a) Amateur Extra Class: Elements 1(C), 3, 4(A), and 4(B);
 - (b) Advanced Class: Elements 1(B), 3, and 4(A);
- (c) General Class and Conditional Class: Elements 1(B) and 3;
 - (d) Technician Class: Elements 1(A) and 3;
 - (e) Novice Class: Elements 1(A) and 2.

§ 97.25 Examination credit.

- (a) An applicant for a higher class of amateur operator license who holds a valid amateur operator license issued upon the basis of an examination by the Commission will be required to pass only those elements of the higher class examination that were not included in the examination for the amateur license held when such application was filed. However, credit will not be allowed for licenses issued on the basis of an examination given under the provisions of § 97.29(b).
- (b) An applicant for an amateur operator license will be given credit for either telegraph code element 1(A) or 1(B) if within 5 years prior to the receipt of his application by the Commission he held a commercial radiotelegraph operator license or permit issued by the Federal Communications Commission. An applicant for an amateur extra class license will be given credit for the telegraph code element 1(C) if he holds a valid first class commercial radiotelegraph operator license or permit issued by the Federal Communications Commission or holds any commercial radioteleraph operator license or permit issued by the Federal Communications Commission containing an aircraft radiotelegraph endorsement.

- (c) An applicant for the Amateur Extra Class operator license will be given credit for examination elements 1(C), 4(A), and 4(B), if he so requests and submits evidence of having held a valid amateur radio station or operator license issued by any agency of the U.S. Government during or prior to April 1917, and qualifies for or currently holds a valid amateur operator license of the General or Advanced Class.
- (d) An applicant for the amateur extra class operator license will be given credit for examination element 1(C) if he so requests and submits evidence of having held the amateur extra first class license, having continuously held its successor license. An applicant should present his proof in advance of the desired examination time to the Chief, Amateur and Citizens Division, Washington, D.C. 20554 and receive a letter of certification for presentation to the field office where the examination will be taken. No code credit will be given without the letter of certification.
- (e) No examination credit, except as herein provided, shall be allowed on the basis of holding or having held any amateur or commercial operator license.

§ 97.27 Availability of Conditional Class license examinations.

The examinations for Conditional Class will be available only under one or more of the following conditions:

- (a) If the applicant's actual residence and proposed amateur station location are more than 175 miles airline distance from the nearest location at which examinations are conducted by an authorized Commission employee or representative at intervals of not more than 6 months for amateur operator license.
- (b) If the applicant is shown by physician's certificate to be unable to appear for examination because of protracted disability.
- (c) If the applicant is shown by certificate of the commanding officer to be in the armed forces of the United States at an Army, Navy, Air Force, or Coast Guard station and, for that reason, to be unable to appear for examination at the time and place designated by the Commission.
- (d) If the applicant demonstrates by sufficient evidence that his temporary residence is for a continuous period of at least 12 months outside the continental limits of the United States, its territories or possessions, irrespective of other provisions of this section.

§ 97.28 Mail examinations for disabled applicants for Amateur Extra and Advanced Class licenses.

- (a) The Commission may permit the examination for an Amateur Extra or Advanced Class license to be administered by a volunteer examiner selected by the applicant when it is shown by a physician's certificate that the applicant is unable to appear for a Commission supervised examination because of protracted disability.
- (b) The volunteer examiner for an Amateur Extra or Advanced Class license examination shall be at least

21 years of age and shall be the holder of a class of amateur operator license equal to or higher than the class of license for which the applicant is being examined. The written portion of the examination shall be obtained, supervised, and submitted in accordance with the procedures set forth in § 97.29(b).

§ 97.29 Manner of conducting examinations.

- (a) Except as provided by § 97.28, the examination for Amateur Extra, Advanced and General Classes of amateur operator licenses will be conducted by an authorized Commission employee or representative at locations and at times specified by the Commission.
- (b) Unless otherwise prescribed by the Commission, an examination for the Conditional, Technician, or Novice Class license will be conducted and supervised by a volunteer examiner selected by the applicant. A volunteer examiner shall be at least 21 years of age and shall be the holder of an Extra, Advanced, or General Class Amateur Radio operator license, or shall hold a Commercial radiotelegraph operator license issued by the Commission, or shall be employed in the service of the United States as the operator of a manually operated radiotelegraph station. The written portion of the examination shall be obtained, supervised, and submitted in accordance with the following procedure:
- (1) Within 10 days after passing the required code test, an applicant shall submit an application (FCC Form 610), together with any filing fee prescribed, to the Commission's office at Gettysburg, Pennsylvania, 17325. The application shall include a written request from the volunteer examiner for the appropriate examination papers. The examiner's written request shall include (i) the names and permanent addresses of the examiner and the applicant, (ii) a description of the examiner's qualifications to administer the examination, (iii) the examiner's statement that the applicant has passed the code test for the class of license involved under his supervision within the 10 days prior to submission of the request, and (iv) the examiner's written signature. Examination papers will be forwarded only to the volunteer examiner.

NOTE: When the applicant is entitled to examination credit for the code test under one of the provisions of § 97.25, an application may be submitted without regard to the 10-day limitation. The examiner's request should then state that a code test was not administered for that reason. The applicant should furnish details as to the class, number, and expiration date of any Commercial radiotelegraph license involved.

- (2) The volunteer examiner shall be responsible for the proper conduct and necessary supervision of the examination. Administration of the examination shall be in accordance with the instructions included with the examination papers and as prescribed in §§ 97.29 (c) and (d), 97.31, and 97.33.
- (3) The examination papers, either completed or unopened in the event the examination is not taken, shall be returned by the volunteer examiner to the Commission's office at Gettysburg, Pa., no later than 30 days

after the date the papers are mailed by the Commission (the date of mailing is normally stamped by the Commission on the outside of the examination envelope).

- (c) The code test required of an applicant for an amateur radio operator license, in accordance with the provisions of §§ 97.21 and 97.23 shall determine the applicant's ability to transmit by hand key (straight key or, if supplied by the applicant, any other type of hand operated key such as a semi-automatic or electronic key) and to receive by ear, in plain language, messages in the international Morse code at not less than the prescribed speed during a five minute test period. Each five characters shall be counted as one word. Each punctuation mark and numeral shall be counted as two characters.
- (d) All written portions of the examinations for amateur operator privileges shall be completed by the applicant in legible handwriting or hand printing. Whenever the applicant's signature is required, his normal signature shall be used. Applicants unable to comply with these requirements, because of physical disability, may dictate their answers to the examination questions and the receiving code test. If the examination or any part thereof is dictated, the examiner shall certify the nature of the applicant's disability and the name and address of the person(s) taking and transcribing the applicant's dictation.

§ 97.31 Grading of examinations.

- (a) Code tests for sending and receiving are graded separately. Failure to pass the required code test for either sending or receiving will terminate the examination.
- (b) Seventy-four percent (74%) is the passing grade for written examinations. For the purpose of grading, each element required in qualifying for a particular license will be considered as a separate examination. All written examinations will be graded only by Commission personnel.

§ 97.33 Eligibility for re-examination.

An applicant who fails examination for an amateur operator license may not take another examination for the same or a higher class amateur operator license within 30 days, except that this limitation shall not apply to an examination for an Advanced or General Class license following an examination conducted by a volunteer examiner for a Novice, Technician, or Conditional Class license.

§ 97.35 Additional examination for holders of operator licenses obtained by mail.

(a) A licensee who holds an amateur license which was obtained by a mail examination under the supervision of a volunteer examiner may be required to appear for a Commission supervised license examination at a location designated by the Commission. If the licensee fails to appear for this examination when directed to do so, or fails to pass such examination, the operator license involved shall be subject to cancellation. When a Novice, Technician, or Conditional Class

license is cancelled under this provision, a new license will not be issued for the same class operator license as that cancelled.

- (b) [Reserved]
- (c) A holder of a Conditional Class license, obtained on the basis of an examination under the provisions of § 97.29(b), is not required to be re-examined when changing residence and station location to within a regular examination area, nor when a new examination location is established within 175 miles airline distance from such licensee's residence and station location.

STATION LICENSES

§ 97.37 General eligibility for station license.

An amateur radio station license will be issued only to a licensed amateur radio operator, except that a military recreation station license may also be issued to an individual not licensed as an amateur radio operator (other than a representative of a foreign government), who is in charge of a proposed military recreation station not operated by the U.S. Government but which is to be located in approved public quarters.

§ 97.39 Eligibility of corporations or organizations to hold station license.

An amateur station license will not be issued to a school, company, corporation, association, or other organization, except that in the case of a bona fide amateur radio organization or society meeting the criteria set forth in Section 97.3, a station license may be issued to a licensed amateur operator, other than the holder of a Novice Class license, as trustee for such society.

§ 97.40 Station license required.

- (a) No transmitting station shall be operated in the amateur radio service without being licensed by the Federal Communications Commission.
- (b) Every amateur radio operator must have a primary amateur radio station license.
- (c) An amateur radio operator may be issued one or more additional station licenses, each for a different land location, except that repeater station, control station, auxiliary link station, and special event station licenses may be issued to an amateur radio operator for land locations where another station license had been issued to the applicant.
- (d) Any transmitter to be operated as part of a control link shall be licensed as a control station or as an auxiliary link station and may be combined with a primary, secondary, or club station license at the same location.
- (e) A transmitter may only be operated as a repeater station under the authority of a repeater station license.

§ 97.41 Application for station license.

- (a) Each application for a club or military recreation station license in the Amateur Radio Service shall be made on the FCC Form 610-B. Each application for any other amateur radio license, except a special event station, shall be made on the FCC Form 610.
- (b) Each application shall state whether the proposed station is a primary or additional station. If the latter, the application shall also state whether the proposed station is a secondary, control, auxiliary link, or repeater station.
- (c) Each application to license a remotely controlled amateur radio station shall be accompanied by a statement so indicating.
- (d) An application by letter to the Amateur and Citizens Division, Federal Communications Commission, Washington, D.C. 20554, may be made by an Advanced Class or Amateur Extra Class licensee for a license to operate one special event station for the period of the celebration, but not to exceed 30 days unless extraordinary circumstances are shown. The application shall contain the following:
- (1) The name, mailing address, photocopy of amateur operator license, and signature of applicant.
- (2) The name and description of the celebration, its significance to the public or to amateur radio operators, and the justification for the proposed special event station.
 - (3) The location of the proposed station.
- (4) The dates the station will be operated, and justification.
 - (5) Specific call sign requested, if desired.
- (e) One application and all papers incorporated therein and made a part thereof shall be submitted for each amateur station license. If the application is only for a station license, other than a special event station, it shall be filed directly with the Commission at its Gettysburg, Pennsylvania office. If the application also contains application for any class of amateur operator license, it shall be filed in accordance with the provisions of § 97.11.
- (f) Applicants proposing to construct a radio station on a site located on land under the jurisdiction of the U.S. Forest Service, U.S. Department of Agriculture, or the Bureau of Land Management, U.S. Department of the Interior, must supply the information and must follow the procedure prescribed by § 1.70 of this chapter.
- (g) Each applicant in the Safety and Special Radio Services (1) for modification of a station license involving a site change or a substantial increase in tower height or (2) for a license for a new station must, before commencing construction, supply the environmental information, where required, and must follow the procedure prescribed by Subpart I of Part 1 of this

chapter (§§ 1.301 through 1.1319) unless Commission action authorizing such construction would be a minor action with the meaning of Subpart I of Part 1.

§ 97.42 Mailing address furnished by licensee.

Except for applications submitted by Canadian citizens pursuant to agreement between the United States and Canada (TIAS No. 2508 and No. 6931), each application shall set forth and each licensee shall furnish the Commission with an address in the United States to be used by the Commission in serving documents or directing correspondence to that licensee. Unless any licensee advises the Commission to the contrary, the address contained in the licensee's most recent application will be used by the Commission for this purpose.

§ 97.43 Location of station.

Every amateur station must have one land location, the address of which is designated on the station license. Every amateur radio station must have at least one control point. If the control point location is not the same as the station location, authority to operate the station by remote control is required.

§ 97.45 Limitations on antenna structures.

- (a) Except as provided in paragraph (b) of this section, an antenna for a station in the Amateur Radio Service which exceeds the following height limitations may not be erected or used unless notice has been filed with both the FAA on FAA Form 7460-1 and with the Commission on Form 714 or on the license application form, and prior approval by the Commission has been obtained for:
- (1) Any construction or alteration of more than 200 feet in height above ground level at its site (§ 17.7 (a) of this chapter).
- (2) Any construction or alteration of greater height than an imaginary surface extending outward and upward at one of the following slopes (§ 17.7(b) of this chapter):
- (i) 100 to 1 for a horizontal distance of 20,000 feet from the nearest point of the nearest runway of each airport with at least one runway more than 3,200 feet in length, excluding heliports and seaplane bases without specified boundaries, if that airport is either listed in the Airport Directory of the current Airman's Information Manual or is operated by a Federal military agency.
- (ii) 50 to 1 for a horizontal distance of 10,000 feet from the nearest point of the nearest runway of each airport with its longest runway no more than 3,200 feet in length, excluding heliports and seaplane bases without specified boundaries, if that airport is either listed in the Airport Directory or is operated by a Federal military agency.
- (iii) 25 to 1 for a horizontal distance of 5,000 feet from the nearest point of the nearest landing and take-

- off area of each heliport listed in the Airport Directory or operated by a Federal military agency.
- (3) Any construction or alteration on an airport listed in the Airport Directory of the Airman's Information Manual (§ 17.7(c) of this chapter).
- (b) A notification to the Federal Aviation Administration is not required for any of the following construction or alteration:
- (1) Any object that would be shielded by existing structures of a permanent and substantial character or by natural terrain or topographic features of equal or greater height, and would be located in the congested area of a city, town, or settlement where it is evident beyond all reasonable doubt that the structure so shielded will not adversely affect safety in air navigation. Applicants claiming such exemption shall submit a statement with their application to the Commission explaining the basis in detail for their finding (§ 17.14 (a) of this chapter).
- (2) Any antenna structure of 20 feet or less in height except one that would increase the height of another antenna structure (§ 17.14(b) of this chapter).
- (c) Further details as to whether an aeronautical study and/or obstruction marking and lighting may be required, and specifications for obstruction marking and lighting when required, may be obtained from Part 17 of this chapter, "Construction, Marking, and Lighting of Antenna Structures." Information regarding the inspection and maintenance of antenna structures requiring obstruction marking and lighting is also contained in Part 17 of this chapter.

§ 97.47 Renewal and/or modification of amateur station license.

- (a) Application for renewal and/or modification of an individual station license shall be submitted on FCC Form 610, and application for renewal and/or modification of an amateur club or military recreation station shall be submitted on FCC Form 610-B. In every case the application shall be accompanied by the applicant's license or photocopy thereof. Applications for renewal of unexpired licenses must be made during the license term and should be filed not later than 60 days prior to the end of the license term. In any case in which the licensee has, in accordance with the provisions of this chapter, made timely and sufficient application for renewal of an unexpired license, no license with reference to any activity of a continuing nature shall expire until such application shall have been finally determined.
- (b) If a license is allowed to expire, application for renewal may be made during a period of grace of 1 year after the expiration date. During this 1-year period of grace, an expired license is not valid. A license renewed during the grace period will be dated currently and will not be backdated to the date of expiration. An application for an individual station license shall be

submitted on FCC Form 610. An application for an amateur club or military recreation station license shall be submitted on FCC Form 610-B. In every case the application shall be accompanied by the applicant's expired license or a photocopy thereof.

- (c) When the name of a licensee is changed (without changes in the ownership, control, or corporate structure), or when the mailing address is changed (without changing the authorized location of the amateur radio station) a formal application for modification of license is not required. However, the licensee shall notify the Commission promptly of these changes. The notice, which may be in letter form, shall contain the name and address of the licensee as they appear in the Commission's records, the new name and/or address, as the case may be, and the call sign and the class of operator license. The notice shall be sent to Federal Communications Commission, Gettysburg, Pa., 17325, and a copy shall be maintained with the license of each station until a new license is issued.
 - (d) [Deleted]
 - (e) [Deleted]

§ 97.49 Commission modification of station license.

- (a) Whenever the Commission shall determine that public interest, convenience, and necessity would be served, or any treaty ratified by the United States will be more fully complied with, by the modification of any radio station license either for a limited time, or for the duration of the term thereof, it shall issue an order for such licensee to show cause why such license should not be modified.
- (b) Such order to show cause shall contain a statement of the grounds and reasons for such proposed modification, and shall specify wherein the said license is required to be modified. It shall require the licensee against whom it is directed to appear at a place and time therein named, in no event to be less than 30 days from the date of receipt of the order, to show cause why the proposed modification should not be made and the order of modification issued.
- (c) If the licensee against whom the order to show cause is directed does not appear at the time and place provided in said order, a final order of modification shall issue forthwith.

CALL SIGNS

§ 97.51 Assignment of call signs.

- (a) The call signs of amateur stations will be assigned systematically by the Commission with the following exceptions:
- (1) A specific unassigned call sign may be reassigned to the most recent holder thereof;
- (2) A specific unassigned call sign may be assigned to a previous holder if not under license during the past 5 years;

- (3) A specific unassigned call sign may be assigned to an amateur organization in memoriam to a deceased member and former holder thereof;
- (4) A specific unassigned call sign may be temporarily assigned to a special event station.
- (5) One unassigned two-letter call sign (a call sign having two letters following the numeral) may be assigned to a previous holder of a two-letter call sign, the prefix of which consisted of not more than a single letter. Additionally, a two-letter call sign may be assigned to an Amateur Extra Class licensee who submits evidence that he held any amateur radio operator or station license, issued by any agency of the U.S. Government or by any foreign government, 25 years or more prior to the receipt date of an application for such assignment. Applicants for two-letter call signs are not permitted to select a specific assignment except in accordance with subparagraphs (1) and (2) of this paragraph.
- (b) An amateur call sign will consist of a sequence of one or two letters, a numeral designating the call sign area, and not more than three letters. The call sign areas are as follows:

No.

- Maine, New Hampshire, Vermont, Massachusetts, Rhode Island. Connecticut.
- 2. New York, New Jersey.
- 3. Pennsylvania, Delaware, Maryland, District of Columbia.
- Virginia, North and South Carolina, Georgia, Florida, Alabama, Tennessee, Kentucky, Puerto Rico and Virgin Islands.
- Mississippi, Louisiana, Arkansas, Oklahoma, Texas, New Mexico.
- California, Hawaii and Pacific possessions except those included in area 7.
- Oregon, Washington, Idaho, Montana, Wyoming, Arizona, Nevada, Utah, Alaska and adjacent islands.
- 8. Michigan, Ohio, West Virginia.
- 9. Wisconsin, Illinois, Indiana.
- Colorado, Nebraska, North and South Dakota, Kansas. Minnesota, Iowa, Missouri.

§ 97.53 Policies and procedures applicable to assignment of call signs.

- (a) The following are regarded as preferred call signs:
- (1) Two-letter call signs—call signs with a single letter prefix (two-letter prefix in Alaska, Hawaii, and in the U.S. possessions) and a two-letter suffix; e.g. W6AB (KH6AB).
- (2) Three-letter call signs—call signs with a single letter prefix and a three-letter suffix; e.g. W6ABC.
- (b) An eligible licensee will be permitted to hold only one two-letter call sign. However, a licensee who, by reason of former rule provisions, presently holds more than one such call sign may continue to hold those call signs in the same call sign areas.
- (c) Subject to availability, two-letter call signs beginning with the letter "W" will normally be assigned in each call sign area to eligible licensees.
 - (d) An eligible licensee who holds one or more three-

letter call signs must relinquish one of those call signs in order to be assigned a two-letter call sign.

- (e) New additional stations will not be assigned a preferred call sign.
- (f) An additional station which is presently assigned a preferred call sign will be issued a nonpreferred call sign upon modification of license to show a station location in a different call sign area.
- (g) Subject to availability, a basic station will be issued the same type of call sign as the one relinquished upon modification of license to show a station location in a different call sign area.
- (1) Licensees will not be assigned specific call signs or their choice of counterpart call signs (call signs with identical suffix letters) under this provision.
- (2) When a two-letter call sign is not available in the new call sign area, an eligible licensee may be assigned an available unspecified three-letter call sign.
- (h) Call signs which have been unassigned for more than one year are normally available for reassignment.

DUPLICATE LICENSES AND LICENSE TERM

§ 97.57 Duplicate license.

Any licensee requesting a duplicate license to replace an original which has been lost, mutilated, or destroyed, shall submit a statement setting forth the facts regarding the manner in which the original license was lost, mutilated, or destroyed. If, subsequent to receipt by the licensee of the duplicate license, the original license is found, either the duplicate or the original license shall be returned immediately to the Commission.

§ 97.59 License term.

- (a) Amateur operator licenses are normally valid for a period of 5 years from the date of issuance of a new or renewed license, except the Novice Class which is normally valid for a period of 2 years from the date of issuance.
- (b) The license for an amateur station is normally valid for a period of 5 years from the date of issuance of a new or renewed license, except that an amateur station license issued to the holder of a Novice Class amateur operator license is normally valid for a period of 2 years from the date of issuance. All amateur station licenses, regardless of when issued, will expire on the same date as the licensee's amateur operator license.
- (c) A duplicate license or a modified license which is not being renewed shall bear the same expiration date as the license for which it is a modification or duplicate.

SUBPART C—TECHNICAL STANDARDS

§ 97.61 Authorized frequencies and emissions.

(a) Following are the frequency bands and associated emissions available to amateur radio stations,

other than repeater stations, subject to the limitations stated in paragraph (b) of this section, §§ 97.65, 97.109, and 97.110.

Frequency band	Emissions	(See paragraph (b))
kHz		
1800-2000	A1, A3	1,2
3500-4000 3500-3775	A1 F1	
3775–3890	A5. F5

(b) Limitations:

(1) The use of frequencies in this band is on a shared basis with the LORAN-A radionavigation system and is subject to cancellation or revision, in whole or in part, by order of the Commission, without hearing, whenever the Commission shall determine such action is necessary in view of the priority of the LORAN-A radionavigation system. The use of these frequencies by amateur stations shall not cause harmful interference to LORAN-A system. If an amateur station causes such interference, operation on the frequencies involved must cease if so directed by the Commission.

(2) Operation shall be limited to:

	Maximum DC plate input power in watts

- (3) Where, in adjacent regions or subregions, a band of frequencies is allocated to different services of the same category, the basic principle is the equality of right to operate. Accordingly, the stations of each service in one region or subregion must operate so as not to cause harmful interference to services in the other regions or subregions (No. 117, the Radio Regulations, Geneva, 1959).
- (4) 3900-4000 kHz and 7100-7300 kHz are not available in the following U.S. possessions: Baker, Canton, Enderbury, Guam, Howland, Jarvis, Palmyra, American Samoa, and Wake Islands.
- (5) Amateur stations shall not cause interference to the Government radiolocation service.
- (6) Not available in those portions of Texas and New Mexico bounded by latitude 33°24′ N., and 31°53′
- N., and longitude 105°40′ W. and 106°40′ W. between the hours 0500 and 1800 local time, Monday through Friday, except to stations authorized to operate in an organized civil defense network when civil defense emergencies exist or when arrangements have been made with the Commission Engineer in Charge at Dallas, Tex., and the Area Frequency Coordinator at White Sands, N. Mex., for drills at specific dates and times.
- (7) In the following areas the d.c. plate input power to the final transmitter stage shall not exceed 50 watts, except when authorized by the appropriate Commission Engineer in Charge and the appropriate Military Area Frequency Coordinator.
 - (i) Those portions of Texas and New Mexico

bounded by latitude $33^{\circ}24'$ N., $31^{\circ}53'$ N., and longitude $105^{\circ}40'$ W. and $106^{\circ}40'$ W.

- (ii) The State of Florida, including the Key West area and the areas enclosed within circles of 200-mile radius centered at 28°21′ N., 80°43′ W. and 30°30′ N., 86°30′ W.
 - (iii) The State of Arizona.
- (iv) Those portions of California and Nevada south of latitude 37°10′ N. and the area within a 200-mile radius of 34°09′ N., 119°11′ W.
- (8) No protection in the band 2400-2500 MHz is afforded from interference due to the operation of industrial, scientific, and medical devices on 2450 MHz.
- (9) No protection in the band 5725-5875 MHz is afforded from interference due to the operation of industrial, scientific and medical devices on 5800 MHz.
- (10) No protection in the band 24.00-24.25 GHz is afforded from interference due to the operation of industrial, scientific and medical devices on 24.125 GHz.
- (11) The use of A3 and F3 in this band is limited to amateur radio stations located outside Region 2.
- (12) Amateur stations shall not cause interference to the Fixed-Satellite Service operating in the band 3400-3500 MHz.
- (13) The frequency 4383.8 kHz, maximum power 150 watts, may be used by any station authorized under this part to communicate with any other station authorized in the State of Alaska for emergency communications. No airborne operations will be permitted on this frequency. Additionally, all stations operating on this frequency must be located in or within 50 nautical miles of the State of Alaska.
- (c) The following transmitting frequency bands and the associated emission authorized in paragraph (a) of this section are available for repeater stations, including both input (receiving) and output (transmitting):

Frequency Band (MHz)

* 29.5–29.7

52.0–54.0

146.0–148.0

222.0–225.0

442.0–450.0

any amateur frequency above 1215 MHz.

The frequency band 29.5–29.7 MHz may be authorized upon a special showing of need for repeater station operation in this band for intracommunity amateur radio communications.

§ 97.63 Individual frequency not specified.

Transmissions by an amateur station may be on any frequency within any authorized amateur band. Sideband frequencies resulting from keying or modulating a carrier wave shall be confined within the authorized amateur band.

§ 97.65 Emission limitations.

(a) Type AØ emission, where not specifically designated in the bands listed in § 97.61, may be used for short periods of time when required for authorized re-

- mote control purposes or for experimental purposes. However, these limitations do not apply where type $A\emptyset$ emission is specifically designated.
- (b) Whenever code practice, in accordance with § 97.91(d), is conducted in bands authorized for A3 emission, tone modulation of the radiotelephone transmitter may be utilized when interspersed with appropriate voice instructions.
- (c) On frequencies below 29.0 MHz and between 50.1 and 52.5 MHz, the bandwidth of an F3 emission (frequency or phase modulation) shall not exceed that of an A3 emission having the same audio characteristics; and the purity and stability of emissions shall comply with the requirements of § 97.73.
- (d) On frequencies below 50 MHz, the bandwidth of A5 and F5 emissions shall not exceed that of an A3 single sideband emission.
- (e) On frequencies between 50 MHz and 225 MHz, single sideband or double sideband A5 emission may be used and the bandwidth shall not exceed that of an A3 single sideband or double sideband signal respectively. The bandwidth of F5 emission shall not exceed that of an A3 single sideband emission.
- (f) Below 225 MHz, A3 and A5 emissions may be used simultaneously on the same carrier frequency provided the total bandwidth does not exceed that of an A3 double sideband emission.

§ 97.67 Maximum authorized power.

- (a) Except for power restrictions as set forth in § 97.61, each amateur transmitter may be operated with a power input not exceeding 1 kilowatt to the plate circuit of the final amplifier stage of an amplifier-oscillator transmitter or to the plate circuit of an oscillator transmitter. An amateur transmitter operating with a power input exceeding 900 watts to the plate circuit shall provide means for accurately measuring the plate power input to the vacuum tube or tubes supplying power to the antenna.
- (b) Notwithstanding the provisions of paragraph (a) of this section, amateur stations shall use the minimum amount of transmitter power necessary to carry out the desired communications.
- (c) Within the limitations of paragraphs (a) and (b) of this section, the effective radiated power of a repeater station shall not exceed that specified for the antenna height above average terrain in the following table:

Antenna height above average terrain	Maximum effective radiated power for frequency bands above:				
	52 MHz	146 MHz	442 MHz	1215 MHz	
Below 50 feet	100 watts	800 watts	Paragraphs (a) and (b).		
50 to 99 feet 100 to 499 feet	100 watts 50 watts	400 watts 400 watts	do 800 watts	Paragraphs (a) and (b).	
500 to 999 feet Above 1,000 feet _	25 watts 25 watts	200 watts 100 watts	800 watts 400 watts	Do. Do.	

§ 97.69 Radio teleprinter transmissions.

The following special conditions shall be observed during the transmission of radio teleprinter signals on authorized frequencies by amateur stations:

- (a) A single channel five-unit (start-stop) teleprinter code shall be used which shall correspond to the International Telegraphic Alphabet No. 2 with respect to all letters and numerals (including the slant sign or fraction bar) but special signals may be employed for the remote control of receiving printers, or for other purposes, in "figures" positions not utilized for numerals. In general, this code shall conform as nearly as possible to the teleprinter code or codes in common commercial usage in the United States.
- (b) The normal transmitting speed of the radio teleprinter signal keying equipment shall be adjusted as closely as possible to one of the standard teleprinter speeds, namely, 60 (45 bauds), 67 (50 bauds), 75 (56.25 bauds) or 100 (75 bauds) words per minute, and in any event, within the range of ± 5 words per minute of the selected standard speed.
- (c) When frequency shift keying (type F1 emission) is utilized, the deviation in frequency from the mark signal to space signal, or from the space signal to the mark signal, shall be less than 900 hertz.
- (d) When adio frequency shift keying (type A2 or type F2 emission) is utilized, the highest fundamental modulating audio frequency shall not exceed 3000 hertz, and the difference between the modulating audio frequency for the mark signal and that for the space signal shall be less than 900 hertz.

§ 97.71 Transmitter power supply.

The licensee of an amateur station using frequencies below 144 megahertz shall use adequately filtered direct-current plate power supply for the transmitting equipment to minimize modulation from this source.

§ 97.73 Purity and stability of emissions.

Spurious radiation from an amateur station being operated with a carrier frequency below 144 megahertz shall be reduced or eliminated in accordance with good engineering practice. This spurious radiation shall not be of sufficient intensity to cause interference in receiving equipment of good engineering design including adequate selectivity characteristics, which is tuned to a frequency or frequencies outside the frequency band of emission normally required for the type of emission being employed by the amateur station. In the case of A3 emission, the amateur transmitter shall not be modulated to the extent that interfering spurious radiation occurs, and in no case shall the emitted carrier wave be amplitude-modulated in excess of 100 percent. Means shall be employed to insure that the transmitter is not modulated in excess of its modulation capability for proper technical operation. For the purposes of this section a spurious radiation is any radiation from a transmitter which is outside the frequency band of emission normal for the type of transmission employed, including any component whose frequency is an integral multiple or submultiple of the carrier frequency (harmonics and subharmonics), spurious modulation products, key clicks, and other transient effects, and parasitic oscillations. When using amplitude modulation on frequencies below 144 megahertz, simultaneous frequency modulation is not permitted and when using frequency modulation on frequencies below 144 megahertz simultaneous amplitude modulation is not permitted. The frequency of the emitted carrier wave shall be as constant as the state of the art permits.

§ 97.75 Frequency measurement and regular check.

The licensee of an amateur station shall provide for measurement of the emitted carrier frequency or frequencies and shall establish procedure for making such measurement regularly. The measurement of the emitted carrier frequency or frequencies shall be made by means independent of the means used to control the radio frequency or frequencies generated by the transmitting apparatus and shall be of sufficient accuracy to assure operation within the amateur frequency band used.

SUBPART D—OPERATING REQUIREMENTS AND PROCEDURES

GENERAL

§ 97.77 Practice to be observed by all licensees.

In all respects not specifically covered by these regulations each amateur station shall be operated in accordance with good engineering and good amateur practice.

§ 97.79 Control operator requirements.

- (a) The licensee of an amateur station shall be responsible for its proper operation.
- (b) Every amateur radio station, when in operation, shall have a control operator at an authorized control point. The control operator shall be on duty, except where the station is operated under automatic control. The control operator may be the station licensee, if a licensed amateur radio operator, or may be another amateur radio operator with the required class of license and designated by the station licensee. The control operator shall also be responsible, together with the station licensee, for the proper operation of the station.
- (c) An amateur station may only be operated in the manner and to the extent permitted by the operator privileges authorized for the class of license held by the control operator, but may exceed those of the station licensee provided proper station identification procedures are performed.
- (d) The licensee of an amateur radio station may permit any third party to participate in amateur radio communication from his station, provided that a control operator is present and continuously monitors and supervises the radio communication to insure compliance with the rules.

§ 97.81 Authorized apparatus.

An amateur station license authorizes the use under control of the licensee of all transmitting apparatus at the fixed location specified in the station license which is operated on any frequency, or frequencies allocated to the amateur service, and in addition authorizes the use, under control of the licensee, of portable and mobile transmitting apparatus operated at other locations.

§ 97.83 Availability of operator license.

The original operator license of each operator shall be kept in the personal possession of the operator while operating an amateur station. When operating an amateur station at a fixed location, however, the license may be posted in a conspicuous place in the room occupied by the operator. The license shall be available for inspection by any authorized Government official whenever the operator is operating an amateur station and at other times upon request made by an authorized representative of the Commission, except when such license has been filed with application for modification or renewal thereof, or has been mutilated. lost or destroyed, and request has been made for a duplicate license in accordance with § 97.57. No recognition shall be accorded to any photocopy of an operator license; however, nothing in this section shall be construed to prohibit the photocopying for other purposes of any amateur radio operator license.

§ 97.85 Availability of station license.

The original license of each amateur station or a photocopy thereof shall be posted in a conspicuous place in the room occupied by the licensed operator while the station is being operated at a fixed location or shall be kept in his personal possession. When the station is operated at other than a fixed location, the original station license or a photocopy thereof shall be kept in the personal possession of the station licensee (or a licensed representative) who shall be present at the station while it is being operated as a portable or mobile station. The original station license shall be available for inspection by any authorized Government official at all times while the station is being operated and at other times upon request made by an authorized representative of the Commission, except when such license has been filed with application for modification or renewal thereof, or has been mutilated, lost, or destroyed, and request has been made for a duplicate license in accordance with § 97.57.

§ 97.87 Station identification.

(a) An amateur station shall be identified by the transmission of its call sign at the beginning and end of each single transmission or exchange of transmissions and at intervals not to exceed 10 minutes during any single transmission or exchange of transmissions or more than 10 minutes duration. Additionally, at the end of an exchange of telegraphy (other than teleprinter) or telephony transmissions between amateur

stations, the call sign (or the generally accepted network identifier) shall be given for the station, or for at least one of the group of stations, with which communication was established.

- (b) When an amateur station is operated as a portable or mobile station, the operator shall give the following additional identification at the end of each single transmission or exchange of transmissions:
- (1) When identifying by telegraphy, immediately after the call sign, transmit the fraction-bar DN followed by the number of the call sign area in which the station is being operated.
- (2) When identifying by telephony, immediately after the call sign, transmit the word "portable" or "mobile", as appropriate, followed by the number of the call sign area in which the station is being operated.
- (c) When an amateur station is operated outside of the 10 call sign areas prescribed in § 97.51(b) and outside of the jurisdiction of a foreign government, the operator shall give the following additional identification at the end of each single transmission or exchange of transmissions:
- (1) When identifying by telegraphy, immediately after the call sign, transmit the fraction-bar DN followed by the designator R 1, R 2, or R 3, to show the region (as defined by the International Radio Regulations, Geneva, 1959) in which the station is being operated.
- (2) When identifying by telephone, immediately after the call sign, transmit the word "mobile" followed by the designator Region 1, Region 2, or Region 3, to show the region (as defined by the International Radio Regulations, Geneva, 1959) in which the station is being operated.
- (d) Under conditions when the control operator is other than the station licensee, the station identification shall be the assigned call sign for that station. However, when a station is operated within the privileges of the operator's class of license but which exceeds those of the station licensee, station identification shall be made by following the station call sign with the operator's primary station call sign (i.e. WN4XYZ/W4XX).
- (e) A repeater station shall be identified by radiotelephony or by radio telegraphy when in service at intervals not to exceed 5 minutes at a level of modulation sufficient to be intelligible through the repeated transmission.
- (f) A control station must be identified by its assigned station call sign unless its emissions contain the call sign identification of the remotely controlled station.
- (g) An auxiliary link station must be identified by its assigned station call sign unless its emissions contain the call sign of its associated station.
- (h) The identification required by paragraphs (a). (b), (c), (d), (e), (f) and (g) of this section shall be given on each frequency being utilized for transmission and shall be transmitted either by telegraphy using the international Morse code, or by telephony,

using the English language. If by an automatic device only used for identification by telegraphy, the code speed shall not exceed 20 words per minute. The use of a national or internationally recognized standard phonetic alphabet as an aid for correct telephone identification is encouraged.

§ 97.88 Operation of a remotely controlled station.

An amateur radio station may be remotely controlled only from an authorized control point, and only where there is compliance with the following:

- (a) A photocopy of the remotely controlled station license must be posted in a conspicuous place at the authorized control point(s), and at the remotely controlled transmitter location. A copy of the system network diagram must be retained at each control point. The transmitting antenna, transmission line, or mast, as appropriate, associated with the remotely controlled transmitter must bear a durable tag marked with the station call sign, the name of the station licensee and other information so that the control operator car readily be contacted by Commission personnel.
- (b) The control link equipment and the remotely controlled station must be accessible only to persons authorized by the licensee. Protection against both inadvertent and unauthorized deliberate emissions must be provided. In the event unauthorized emissions occur, the station operation must be suspended until such time as adequate protection is incorporated, or until there is reasonable assurance that unauthorized emissions will not recur.
- (c) Except for operation under automatic control, as provided by §§ 97.110(c) and 97.111(g), a control operator designated by the licensee must be present at an authorized control point while the station is being remotely controlled. Immediately prior to, and during the periods the remotely controlled station is in operation, the frequencies used for emission by the remotely controlled transmitter must be continuously monitored by the control operator. The control operator must terminate transmission upon any deviation from the rules.
- (d) Provisions must be incorporated to limit transmission to a period of no more than 3 minutes in the event of malfunction in the control link.
- (e) A repeater station may be operated by radio remote control only where the control link utilizes frequencies other than the repeater station receiving frequencies.

§ 97.89 Points of Communications.

- (a) Amateur stations may communicate with:
- (1) Other amateur stations, excepting those prohibited by Appendix 2.
- (2) Stations in other services licensed by the Commission and with U.S. Government stations for civil defense purposes in accordance with Subpart F of this part, in emergencies and, on a temporary basis, for test purposes.
- (3) Any station which is authorized by the Commission to communicate with amateur stations.

- (b) Amateur stations may be used for transmitting signals, or communications, or energy, to receiving apparatus for the measurement of emissions, temporary observation of transmission phenomena, radio control of remote objects, and similar experimental purposes and for the purposes set forth in § 97.91.
 - (c) [Reserved]
- (d) Control stations and auxiliary link stations may not be used to communicate with any other station than those shown in the system network diagram.

§ 97.91 One-way communications.

In addition to the experimental one-way transmission permitted by § 97.89, the following kinds of one-way communications, addressed to amateur stations, are authorized and will not be construed as broadcasting: (a) Emergency communications, including bonafide emergency drill practice transmissions; (b) Information bulletins consisting solely of subject matter having direct interest to the amateur radio service as such; (c) Round-table discussions or net-type operations where more than two amateur stations are in communication, each station taking a turn at transmitting to other station(s) of the group; and (d) Code practice transmissions intended for persons learning or improving proficiency in the International Morse Code.

§ 97.93 Modulation of carrier.

Except for brief tests or adjustments, an amateur radiotelephone station shall not emit a carrier wave on frequencies below 51 megahertz unless modulated for the purpose of communication. Single audiofrequency tones may be transmitted for test purposes of short duration for the development and perfection of amateur radio telephone equipment.

STATION OPERATION AWAY FROM AUTHORIZED LOCATION

$\S\,97.95\,$ Operation away from the authorized fixed operation station location.

- (a) Operation within the United States, its territories, or possessions is permitted as follows:
- (1) When there is no change in the authorized fixed operation station location, an amateur radio station other than a military recreation, auxiliary link, or special event station, may be operated under its station license anywhere in the United States, its territories or possessions, as a portable or mobile operation, subject to § 97.61.
- (2) When the authorized permanent station location is changed, formal application (FCC Form 610 for an individual station license and FCC Form 610-B for an amateur club or military recreation station license) must be submitted to the Commission prior to any operation and within 4 months of the move for the purpose of modifying the station license to show the new permanent station location. Operation at the new location is permitted under the license for the former station from the date the modification application is mailed until advised of Commission action on that application.

- (3) For operations under subparagraphs (1) and (2) of this paragraph, advance notice, as required by § 97.97, must be given to the Engineer in Charge of each radio district in which operation is intended and the portable identification procedures specified in § 97.87 must be used.
- (b) When outside the continental limits of the United States, its territories, or possessions, an amateur radio station may be operated as portable or mobile only under the following conditions:
- (1) Operation may not be conducted within the jurisdiction of a foreign government except pursuant to, and in accordance with express authority granted to the licensee by such foreign government. When a foreign government permits Commission licensees to operate within its territory, the amateur frequency bands which may be used shall be as prescribed or limited by that government. (See Appendix 4 of this Part for the text of treaties or agreements between the United States and foreign governments relative to reciprocal amateur radio operation.)
- (2) When outside the jurisdiction of a foreign government, operation may be conducted within Region 2 on any amateur frequency band between 7.0 MHz and 148 MHz, inclusive; and when not within Region 2, operation may be conducted only in the amateur bands 7.0–7.1 MHz, 14.00–14.35 MHz, 21.00–21.45 MHz, and 28.0–29.7 MHz.

Note: Region 2 is defined as follows: On the east, a line (B) extending from the North Pole along meridian 10° west of Greenwich to its intersection with parallel 72° north; thence by Great Circle Arc to the intersection of meridian 50° west and parallel 40° north; thence by Great Circle Arc to the intersection of meridian 20° west and parallel 10° south; thence along meridian 20° west to the South Pole. On the west, a line (C) extending from the North Pole by Great Circle Arc to the intersection of parallel 65°30' north with the international boundary in Bering Strait; thence by Great Circle Arc to the intersection of meridian 165° east of Greenwich and parallel 50° north; thence by Great Circle Arc to the intersection of meridian 170° west and parallel 10° north; thence along parallel 10° north to its intersection with meridian 120° west, thence along meridian 120° west to the South Pole.

(3) Notice of such operation, in accordance with the provisions of § 97.97, shall be given to the Engineer in Charge of the district having jurisdiction of the authorized fixed transmitter location.

§ 97.97 Notice of operation away from authorized location.

Whenever an amateur station is, or is likely to be, in portable operation at a single location for a period exceeding 15 days, the licensee shall give advanced written notice of such operation to the Commission's office specified in § 97.95. A new notice is required whenever there is any change in the particulars of a previous notice or whenever operation away from the authorized station continues for a period in excess of 1 year. The notice required by this section shall contain the following information:

- (a) Name of licensee.
- (b) Station call sign.
- (c) Authorized station location shown on station license.
- (d) Specific geographical location of station when in portable operation.
- (e) Dates of the beginning and end of the portable operation.
- (f) Address at which, or through which, the licensee can be readily reached.

SPECIAL PROVISIONS

§ 97.99 Stations used only for radio control of remote model crafts and vehicles.

An amateur transmitter when used for the purpose of transmitting radio signals intended only for the control of a remote model craft or vehicle and having mean output power not exceeding one watt may be operated under the special provisions of this section provided an executed Transmitter Identification Card (FCC Form 452–C) or a plate made of a durable substance indicating the station call sign and licensee's name and address is affixed to the transmitter.

- (a) Station identification is not required for transmissions directed only to a remote model craft or vehicle.
- (b) Transmissions containing only control signals directed only to a remote model craft or vehicle are not considered to be codes or ciphers in the context of the meaning of § 97.117.
- (c) Notice of operation away from authorized location is not required where the portable or mobile operation consists entirely of transmissions directed only to a remote model craft or vehicle.
- (d) Station logs need not indicate the times of commencing and terminating each transmission or series of transmissions.

§ 97.101 Mobile stations aboard ships or aircraft.

In addition to complying with all other applicable rules, an amateur mobile station operated on board a ship or aircraft must comply with all of the following special conditions: (a) The installation and operation of the amateur mobile station shall be approved by the master of the ship or captain of the aircraft; (b) The amateur mobile station shall be separate from and independent of all other radio equipment, if any, installed on board the same ship or aircraft; (c) The electrical installation of the amateur mobile station shall be in accord with the rules applicable to ships or aircraft as promulgated by the appropriate government agency; (d) The operation of the amateur mobile station shall not interfere with the efficient operation of any other radio equipment installed on board the same ship or aircraft; and (e) The amateur mobile station and its associated equipment, either in itself or in its method of operation, shall not constitute a hazard to the safety of life or property.

Logs

§ 97.103 Station log requirements.

An accurate legible account of station operation shall be entered into a log for each amateur radio station. The following items shall be entered as a minimum:

- (a) The call sign of the station, the signature of the station licensee, or a photocopy of the station license.
- (b) The locations and dates upon which fixed operation of the station was initiated and terminated. If applicable, the location and dates upon which portable operation was initiated and terminated at each location.
- (1) The date and time periods the duty control operator for the station was other than the station licensee, and the signature and primary station call sign of that duty control operator.
- (2) A notation of third party traffic sent or received, including names of all third parties, and a brief description of the traffic content. This entry may be in a form other than written, but one which can be readily transcribed by the licensee into written form.
- (3) Upon direction of the Commission, additional information as directed shall be recorded in the station log.
- (c) The log of a remotely controlled station shall have entered the address for each control point and a functional block diagram and a technical explanation sufficient to describe the operation of the control link. Additionally, the following shall be entered:
- (1) Description of the measures taken for protection against access to the remote station by unauthorized persons.
- (2) Description of the measures taken for protection against unauthorized station operation, either through activation of the control link or otherwise.
- (3) Description of the provisions for shutting down the station in case of control link malfunction.
- (4) Description of the means provided for monitoring the transmitting frequencies.
- (5) Photocopies of all control station licenses and all auxiliary link station licenses.
- (d) When a station has one or more associated stations, i.e., control station and/or auxiliary link station, a system network diagram shall be entered.
- (e) The log of a control station or an auxiliary link station shall have the following information entered:
- A system network diagram for each system with which the station is associated.
 - (2) The station transmitting band(s).
- (3) Description of the means provided for monitoring the transmitting frequencies.
- (4) The transmitter power input and justification that such power is in compliance with § 97.67(b).
- (5) If an auxiliary link station is being operated by remote control, all of the information required by paragraph (b) of this section shall also be entered.
- (f) Notwithstanding the provisions of § 97.105, the log entries required by paragraph (c), and (d)

and (e) of this section shall be retained in the station log until such time as they are amended.

§ 97.105 Retention of logs.

The station log shall be preserved for a period of at least 1 year following the last date of entry and retained in the possession of the licensee. Copies of the log, including the sections required to be transcribed by § 97.103, shall be available to the Commission for inspection.

EMERGENCY OPERATIONS

§ 97.107 Operation in emergencies.

In the event of an emergency disrupting normally available communication facilities in any widespread area or areas, the Commission, in its discretion, may declare that a general state of communications emergency exists, designate the area or areas concerned, and specify the amateur frequency bands, or segments of such bands, for use only by amateurs participating in emergency communication within or with such affected area or areas. Amateurs desiring to request the declaration of such a state of emergency should communicate with the Commission's Engineer in Charge of the area concerned. Whenever such declaration has been made, operation of and with amateur stations in the area concerned shall be only in accordance with the requirements set forth in this section, but such requirements shall in nowise affect other normal amateur communication in the affected area when conducted on frequencies not designated for emergency

- (a) All transmissions within all designated amateur communications bands ¹ other than communications relating directly to relief work, emergency service, or the establishment and maintenance of efficient amateur radio networks for the handling of such communications shall be suspended. Incidental calling, answering, testing or working (including casual conversations, remarks or messages) not pertinent to constructive handling of the emergency situation shall be prohibited within these bands.
- (b) The Commission may designate certain amateur stations to assist in the promulgation of information relating to the declaration of a general state of communications emergency, to monitor the designated amateur emergency communications bands, and to warn non-complying stations observed to be operating in those bands. Such station, when so designated, may transmit for that purpose on any frequency or frequencies authorized to be used by that station, provided such transmissions do not interfere with essential emergency communications in progress; however,

¹The frequency 4383.8 kHz may be used by any station authorized under this part to communicate with any other station in the State of Alaska for emergency communications. No airborne operations will be permitted on this frequency. Additionally, all stations operating on this frequency must be located in or within 50 nautical miles of the State of Alaska.

such transmissions shall preferably be made on authorized frequencies immediately adjacent to those segments of the amateur bands being cleared for the emergency. Individual transmissions for the purpose of advising other stations of the existence of the communications emergency shall refer to this section by number (§ 97.107) and shall specify, briefly and concisely, the date of the Commission's declaration, the area and nature of the emergency, and the amateur frequency bands or segments of such bands which constitute the amateur emergency communications bands at the time. The designated stations shall not enter into discussions with other stations beyond furnishing essential facts relative to the emergency, or acting as advisors to stations desiring to assist in the emergency, and the operators of such designated stations shall report fully to the Commission the identity of any stations failing to comply, after notice, with any of the pertinent provisions of this section.

(c) The special conditions imposed under the provisions of this section shall cease to apply only after the Commission, or its authorized representative, shall have declared such general state of communications emergency to be terminated: however, nothing in this paragraph shall be deemed to prevent the Commission from modifying the terms of its declaration from time to time as may be necessary during the period of a communications emergency, or from removing those conditions with respect to any amateur frequency band or segment of such band which no longer appears essential to the conduct of the emergency communications.

OPERATION OF ADDITIONAL STATIONS

§ 97.109 Operation of a control station.

- (a) Amateur frequency bands above 220 MHz, excepting 435 to 438 MHz, may be used for emissions by a control station. Frequencies below 225 MHz used for control links must be monitored by the control operator immediately prior to, and during, periods of operation.
- (b) Where a remotely controlled station has been authorized to be operated from one or more remote control stations, those remote control stations may be operated either mobile or portable.

§ 97.110 Operation of an auxiliary link station.

- (a) An auxiliary link station may use amateur frequency bands above 220 MHz, excepting 435 to 438 MHz, for emissions. Except as provided in § 97.110(c), frequencies below 225 MHz used by an auxiliary link station shall be monitored by the control operator immediately prior to, and during, periods of operation.
- (b) An auxiliary link station may only be used for fixed operation from the location specified on the station license.
- (c) An auxiliary link station licensed either for operation by local control or remote control may also be operated by automatic control when it is operated as a part of a repeater station system which is being operated under automatic control. Both the auxiliary

link station and the repeater station must appear on the system network diagram.

§ 97.111 Operation of a repeater station.

- (a) Emissions from a repeater station shall be discontinued within 5 seconds after cessation of radio-communications by the user station. Provisions to automatically limit the access to a repeater station may be incorporated, but are not mandatory.
- (b) Except for automatic control operations as provided in paragraph (g) of this section, the transmitting and receiving frequencies utilized by the repeater station shall be continuously monitored by the control operator immediately prior to, and during, periods of operation.
- (c) A repeater station may concurrently receive and retransmit amateur radio signals on one or more frequency bands authorized for repeater stations, but may not concurrently retransmit on more than one frequency within the same band except when specifically approved by the Commission. A repeater station authorized to operate in conjunction with one or more auxiliary link stations for relaying radio signals, received at another location(s), to the repeater station may utilize input (receiving) frequencies not available for repeater stations, provided the input frequencies to the auxiliary link station(s) are in frequency bands authorized to repeater stations.
- (d) A repeater station shall be operated in a manner so as to assure that the station is not used for one-way radiocommunication other than provided for in § 97.91.
- (e) A station licensed as a repeater station may only be operated as a repeater station, excepting for short periods for testing or for emergencies.
- (f) When in operation, the log of a repeater station must also show the following information for each frequency band in use.
- (1) Location of the station transmitting antenna, marked upon a topographic map having a scale of 1:250,000, and contour intervals.¹
- (2) The transmitting antenna height above average terrain.²
- (3) The effective radiated power in the horizontal plane for the main lobe of the antenna pattern, calculated for maximum transmitter output power.
 - (4) The transmitter output power.
- (5) The loss in the transmission line between the transmitter and the antenna, expressed in decibels.
- (6) The relative gain in the horizontal plane of the transmitting antenna.
- (7) The horizontal and vertical radiation patterns of the transmitting antenna, with reference to true north (for horizontal pattern only), expressed as relative field strength (voltage) or in decibels, drawn upon polar coordinate graph paper, and method of determining the patterns.

¹Indexes and ordering information for suitable maps are available from U.S. Geological Survey, Washington, D.C. 20242, or Federal Center, Denver, Colorado 80225.

² See Appendix 5.

- (g) A repeater station licensed either for local control or for remote control may also be operated under automatic control where:
- (1) Devices and procedures have been implemented to assure that compliance with the rules can be accomplished without the duty control operator present at the control point at all times the station is in operation.
- (2) All radiocommunications transmitted by the station are monitored by the duty control operator in real-time, or are recorded so that they can be reproduced and reviewed within 72 hours. The recordings shall be preserved for a period of at least 30 days, in the possession of the station licensee, and must be made available to the Commission upon request. However, real-time monitoring, or recording and review of repeater operation is not required when the facility is operated as a closed repeater, i.e., the repeater station employs means to restrict usage to persons specifically authorized by the control operator or station licensee.
- (3) Upon notification by the Commission of improper operation of a station under automatic control, said operation must be immediately discontinued until all deficiencies have been corrected.

SUBPART E—PROHIBITED PRACTICES AND ADMINISTRATIVE SANCTIONS

PROHIBITED TRANSMISSIONS AND PRACTICES

§ 97.112 No remuneration for use of station.

- (a) An amateur station shall not be used to transmit or receive messages for hire, nor for communication for material compensation, direct or indirect, paid or promised.
- (b) Control operators of a Club Station may be compensated when the club station is operated primarily for the purpose of conducting amateur radio-communication to provide telegraphy practice transmissions intended for persons learning or improving proficiency in the International Morse Code, or to disseminate information bulletins consisting solely of subject matter having direct interest to the Amateur Radio Service provided:
- (1) The station conducts telegraphy practice and bulletin transmission for at least 40 hours per week;
- (2) The station schedules operations on all allocated medium and high frequency amateur bands using reasonable measures to maximize coverage.
- (3) The schedule of normal operating times and frequencies is published at least 30 days in advance of the actual transmissions.

Control operators may accept compensation only for such periods of time during which the station is transmitting telegraphy practice or bulletins. A control operator shall not accept any direct or indirect compensation for periods during which the station is transmitting material other than telegraphy practice or bulletins.

§ 97.113 Broadcasting prohibited.

Subject to the provisions of § 97.91, an amateur station shall not be used to engage in any form of broadcasting, that is, the dissemination of radio communications intended to be received by the public directly or by the intermediary of relay stations, nor for the retransmission by automatic means of programs or signals emanating from any class of station other than amateur. The foregoing provisions shall not be construed to prohibit amateur operators from giving their consent to the rebroadcast by broadcast stations of the transmissions of their amateur stations, provided, that the transmissions of the amateur stations shall not contain any direct or indirect reference to the rebroadcast.

§ 97.114 Third party traffic.

The transmission or delivery of the following amateur radiocommunication is prohibited:

- (a) International third party traffic except with countries which have assented thereto;
- (b) Third party traffic involving material compensation, either tangible or intangible, direct or indirect, to a third party, a station licensee, a control operator, or any other person.
- (c) Except for an emergency communication as defined in this part, third party traffic consisting of business communications on behalf of any party. For the purpose of this section business communication shall mean any transmission or communication the purpose of which is to facilitate the regular business or commercial affairs of any party.

§ 97.115 Music prohibited.

The transmission of music by an amateur station is forbidden.

§ 97.116 Amateur radiocommunication for unlawful purposes prohibited.

The transmission of radiocommunication or messages by an amateur radio station for any purpose, or in connection with any activity, which is contrary to Federal, State, or local law is prohibited.

§ 97.117 Codes and ciphers prohibited.

The transmission by radio of messages in codes or ciphers in domestic and international communications to or between amateur stations is prohibited. All communications regardless of type of emission employed shall be in plain language except that generally recognized abbreviations established by regulation or custom and usage are permissible as are any other abbreviations or signals where the intent is not to obscure the meaning but only to facilitate communications.

§ 97.119 Obscenity, indecency, profanity.

No licensed radio operator or other person shall transmit communications containing obscene, indecent, or profane words, language, or meaning.

§ 97.121 False signals.

No licensed radio operator shall transmit false or deceptive signals or communications by radio, or any

call letter or signal which has not been assigned by proper authority to the radio station he is operating.

§ 97.123 Unidentified communications.

No licensed radio operator shall transmit unidentified radio communications or signals.

§ 97.125 Interference.

No licensed radio operator shall willfully or maliciously interfere with or cause interference to any radio communication or signal.

§ 97.126 Retransmitting radio signals.

No amateur radio station, except a properly licensed repeater station, auxiliary link station, or a remotely controlled station may automatically retransmit the radio signals of other amateur radio stations. A remotely controlled station, other than a remotely controlled repeater station or auxiliary link station, may retransmit only the radio signals of auxiliary link stations shown on the station system network diagram.

§ 97.127 Damage to apparatus.

No licensed radio operator shall willfully damage, or cause or permit to be damaged, any radio apparatus or installation in any licensed radio station.

§ 97.129 Fraudulent licenses.

No licensed radio operator or other person shall obtain or attempt to obtain, or assist another to obtain or attempt to obtain, an operator license by fraudulent means.

ADMINISTRATIVE SANCTIONS

§ 97.131 Restricted operation.

(a) If the operation of an amateur station causes general interference to the reception of transmissions from stations operating in the domestic broadcast service when receivers of good engineering design including adequate selectivity characteristics are used to receive such transmissions and this fact is made known to the amateur station licensee, the amateur station shall not be operated during the hours from 8 p.m. to 10:30 p.m., local time, and on Sunday for the additional period from 10:30 a.m. until 1 p.m., local time, upon the frequency or frequencies used when the interference is created.

(b) In general, such steps as may be necessary to minimize interference to stations operating in other services may be required after investigation by the Commission.

§ 97.133. Second notice of same violation.

In every case where an amateur station licensee is cited within a period of 12 consecutive months for the second violation of the provisions of §§ 97.61, 97.63, 97.65, 97.71, or 97.73, the station licensee, if directed to do so by the Commission, shall not operate the station and shall not permit it to be operated from 6 p.m. to 10:30 p.m., local time, until written notice has been received authorizing the resumption of full-time op-

eration. This notice will not be issued until the licensee has reported on the results of tests which he has conducted with at least two other amateur stations at hours other than 6 p.m. to 10:30 p.m., local time. Such tests are to be made for the specific purpose of aiding the licensee in determining whether the emissions of the station are in accordance with the Commission's rules. The licensee shall report to the Commission the observations made by the cooperating amateur licensees in relation to the reported violations. This report shall include a statement as to the corrective measures taken to insure compliance with the rules.

§ 97.135 Third notice of same violation.

In every case where an amateur station licensee is cited within a period of 12 consecutive months for the third violation of §§ 97.61, 97.63, 97.65, 97.71, or 97.73, the station licensee, if directed by the Commission, shall not operate the station and shall not permit it to be operated from 8 a.m. to 12 midnight, local time, except for the purposes of transmitting a prearranged test to be observed by a monitoring station of the Commission to be designated in each particular case. The station shall not be permitted to resume operation during these hours until the licensee is authorized by the Commission, following the test, to resume full-time operation. The results of the test and the licensee's record shall be considered in determining the advisability of suspending the operator license or revoking the station license, or both.

§ 97.137 Answers to notices of violations.

Any licensee receiving official notice of a violation of the terms of the Communications Act of 1934, as amended, any legislative act, Executive order, treaty to which the United States is a party, or the rules and regulations of the Federal Communications Commission, shall, within 10 days from such receipt, send a written answer direct to the office of the Commission originating the official notice: Provided, however, That if an answer cannot be sent or an acknowledgment made within such 10-day period by reason of illness or other unavoidable circumstances, acknowledgment and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay. The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. If the notice relates to some violation that may be due to the physical or electrical characteristics of transmitting apparatus, the answer shall state fully what steps, if any, are taken to prevent future violations, and if any new apparatus is to be installed, the date such apparatus was ordered, the name of the manufacturer, and promised date of delivery. If the notice of violation relates to some lack of attention or improper operation of the transmitter, the name of the operator in charge shall be given.

SUBPART F—RADIO AMATEUR CIVIL EMERGENCY SERVICE (RACES)

GENERAL

§ 97.161 Basis and purpose.

The Radio Amateur Civil Emergency Service provides for amateur radio operation for civil defense communications purposes only, during periods of local, regional or national civil emergencies, including any emergency which may necessitate invoking of the President's War Emergency Powers under the provisions of section 606 of the Communications Act of 1934, as amended.

§97.163 Definitions.

For the purposes of this Subpart, the following definitions are applicable:

- (a) Radio Amateur Civil Emergency Service. A radiocommunication service conducted by volunteer licensed amateur radio operators, for providing emergency radiocommunications to local, regional, or state civil defense organizations.
- (b) RACES station. An amateur radio station licensed to a civil defense organization, at a specific land location, for the purpose of providing the facilities for amateur radio operators to conduct amateur radiocommunications in the Radio Amateur Civil Emergency Service.

§ 97.165 Applicability of rules.

In all cases not specifically covered by the provisions contained in this Subpart, amateur radio stations and RACES stations shall be governed by the provisions of the rules governing amateur radio stations and operators (Subpart A through E of this part).

STATION AUTHORIZATIONS

§ 97.169 Station license required.

No transmitting station shall be operated in the Radio Amateur Civil Emergency Service unless:

- (a) The station is licensed as a RACES station by the Federal Communications Commission, or
- (b) The station is an amateur radio station licensed by the Federal Communications Commission, and is certified by the responsible civil defense organization as registered with that organization.

§ 97.171 Eligibility for RACES station license.

A RACES station will only be licensed to a local, regional, or state civil defense organization.

§ 97.173 Application for RACES station license.

- (a) Each application for a RACES station license shall be made on the FCC Form 610--B.
- (b) The application shall be signed by the civil defense official responsible for the coordination of all civil defense activities in the area concerned.
- (c) The application shall be countersigned by the responsible official for the governmental entity served by the civil defense organization.

(d) If the application is for a RACES station to be in any special manner covered by § 97.41, those showings specified for non-RACES stations shall also be submitted.

§ 97.175 Amateur radio station registration in civil defense organization.

No amateur radio station shall be operated in the Radio Amateur Civil Emergency Service unless it is certified as registered in a civil defense organization by that organization.

OPERATING REQUIREMENTS

§ 97.177 Operator requirements.

No person shall be the control operator of a RACES station, or shall be the control operator of an amateur radio station conducting communications in the Radio Amateur Civil Emergency Service unless that person holds a valid amateur radio operator license and is certified as enrolled in a civil defense organization by that organization.

§ 97.179 Operator privileges.

Operator privileges in the Radio Amateur Civil Emergency Service are dependent upon, and identical to, those for the class of operator license held in the Amateur Radio Service.

§ 97.181 Availability of RACES station license and operator licenses.

- (a) The original license of each RACES station, or a photocopy thereof, shall be attached to each transmitter of such station, and at each control point of such station. Whenever a photocopy of the RACES station license is utilized in compliance with this requirement, the original station license shall be available for inspection by any authorized Government official at all times while the station is being operated and at other times upon request made by an authorized representative of the Commission, except when such license has been filed with application for modification or renewal thereof, or has been mutilated, lost, or destroyed, and request has been made for a duplicate license in accordance with § 97.57.
- (b) In addition to the operator license availability requirements of § 97.83, a photocopy of the control operator's amateur radio operator license shall be posted at a conspicuous place at the control point for the RACES station.

TECHNICAL REQUIREMENTS

§ 97.185 Frequencies available.

- (a) All of the authorized frequencies and emissions allocated to the Amateur Radio Service are also available to the Radio Amateur Civil Emergency Service on a shared basis.
- (b) In the event of any emergency which necessitates the invoking of the President's War Emergency Powers

under the provisions of section 606 of the Communications Act of 1934, as amended, unless modified or otherwise directed, RACES stations and amateur radio stations participating in RACES will be limited in operation to the following:

FREQUENCY OR FREQUENCY BANDS

kHz:	Limitations
1800-1825	1
1975-2000	1
3515-3550	2, 4
3984-4000	
3997	3
7097-7103	4
7103-7125	2, 4
7245-7255	2, 4
14047-14053	4
14220-14230	2, 4
21047-21053	4
28.55-28.75	
29.45-29.65	
50.35-50.75	
53.30	3
53.35-53.75	
145.17-145.71	
146.79-147.33	
220-225	5

- (c) Limitations: (1) Use of frequencies in the band 1800-2000 kHz is subject to the priority of the Loran system of radionavigation in this band and to the geographical, frequency, emission, and power limitations contained in § 97.61 governing amateur radio stations and operators (Subparts A through E of this part).
- (2) The availability of the frequency bands 3515–3550 kHz, 7103–7125 kHz, 7245–7247 kHz, 7253–7255 kHz, 14220–14222 kHz, and 14228–14230 kHz for use during periods of actual civil defense emergency is limited to the initial 30 days of such emergency, unless otherwise ordered by the Commission.
- (3) For use in emergency areas when required to make initial contact with military unit; also, for communications with military stations on matters requiring coordinations.
- (4) For use by all authorized stations only in the continental United States, except that the bands 7245–7255 kHz and 14220–14230 kHz are also available in Alaska, Hawaii, Puerto Rico, and the Virgin Islands.
- (5) Those stations operating in the band 220-225 MHz shall not cause harmful interference to the government radiologation service.

§ 97.189 Points of communications.

- (a) RACES stations may only be used to communicate with:
 - (1) Other RACES stations;
- (2) Amateur radio stations certified as being registered with a civil defense organization, by that organization;
- (3) Stations in the Disaster Communications Service;
- (4) Stations of the United States Government authorized by the responsible agency to exchange communications with RACES stations;

- (5) Any other station in any other service regulated by the Federal Communications Commission, whenever such station is authorized by the Commission to exchange communications with stations in the Radio Amateur Civil Emergency Service.
- (b) Amateur radio stations registered with a civil defense organization may only be used to communicate with:
- (1) RACES stations licensed to the civil defense organization with which the amateur radio station is registered:
- (2) Any of the following stations upon authorization of the responsible civil defense official for the organization in which the amateur radio station is registered:
- (i) Any RACES station licensed to other civil defense organizations:
- (ii) Amateur radio stations registered with the same or another civil defense organization;
- (iii) Stations in the Disaster Communications Service:
- (iv) Stations of the United States Government authorized by the responsible agency to exchange communications with RACES stations:
- (v) Any other station in any other service regulated by the Federal Communications Commission, whenever such station is authorized by the Commission to exchange communications with stations in the Radio Amateur Civil Emergency Service.

§ 97.191 Permissible communications.

- All communications in the Radio Amateur Civil Emergency Service must be specifically authorized by the civil defense organization for the area served. Stations in this service may transmit only civil defense communications of the following types:
- (a) Communications concerning impending or actual conditions jeopardizing the public safety, or affecting the national defense or security during periods of local, regional, or national civil emergencies:
- (1) Comunications directly concerning the immediate safety of life or individuals, the immediate protection of property, maintenance of law and order, alleviation of human suffering and need, and the combating of armed attack or sabotage;
- (2) Communications directly concerning the accumulation and dissemination of public information or instructions to the civilian population essential to the activities of the civil defense organization or other authorized governmental or relief agencies.
- (b) Communications for training drills and tests necessary to ensure the establishment and maintenance of orderly and efficient operation of the Radio Amateur Civil Emergency Service as ordered by the responsible civil defense organization served. Such tests and drills may not exceed a total time of one hour per week
- (c) Brief one way transmissions for the testing and adjustment of equipment.

§ 97.193 Limitations on the use of RACES stations.

- (a) No station in the Radio Amateur Civil Emergency Service shall be used to transmit or to receive messages for hire, nor for communications for material compensation, direct or indirect, paid or promised.
- (b) All messages which are transmitted in connection with drills or tests shall be clearly identified as such by use of the words "drill" or test", as appropriate, in the body of the messages.

SUBPART G—OPERATION OF AMATEUR RADIO STATIONS IN THE UNITED STATES BY ALIENS PURSUANT TO RECIPROCAL AGREEMENTS

§ 97.301 Basis, purpose, and scope.

- (a) The rules in this subpart are based on, and are applicable solely to, alien amateur operations pursuant to section 303(1)(3) and 310(a) of the Communications Act of 1934, as amended. (See Pub. L. 93–505, 88 Stat. 1576.)
- (b) The purpose of this subpart is to implement Public Law 88–313 by prescribing the rules under which an alien, who holds an amateur operator and station license issued by his government (hereafter referred to as an alien amateur), may operate an amateur radio station in the United States, in its possessions, and in the Commonwealth of Puerto Rico (hereafter referred to only as the United States).

§ 97.303 Permit required.

(a) Before he may operate an amateur radio station in the United States, under the provisions of sections 303(1)(2) and 310(a) of the Communications Act of 1934, as amended, an alien amateur licensee must obtain a permit for such operation from the Federal Communications Commission. A permit for such operation shall be issued only to an alien holding a valid amateur operator and station authorization from his government, and only when there is in effect a bilateral agreement between the United States and that government for such operation on a reciprocal basis by United States amateur radio operators.

§ 97.305 Application for permit.

- (a) Application for a permit shall be made on FCC Form 610-A. Form 610-A may be obtained from the Commission's Washington, D.C., office, from any of the Commission's field offices and, in some instances, from United States missions abroad.
- (b) The application form shall be completed in full in English and signed by the applicant. A photocopy of the applicant's amateur operator and station license issued by his government shall be filed with the application. The Commission may require the applicant to furnish additional information. The application must

be filed by mail or in person with the Federal Communications Commission, Washington, D.C., 20554, U.S.A. To allow sufficient time for processing, the application should be filed at least 60 days before the date on which the applicant desires to commence operation.

§ 97.307 Issuance of permit.

- (a) The Commission may issue a permit to an alien amateur under such terms and conditions as it deems appropriate. If a change in the terms of a permit is desired, an application for modification of the permit is required. If operation beyond the expiration date of a permit is desired, an application for renewal of the permit is required. In any case in which the permittee has, in accordance with the provisions of this subpart, made a timely and sufficient application for renewal of an unexpired permit, such permit shall not expire until the application has been finally determined. Application for modification or for renewal of a permit shall be filed on FCC Form 610–A.
- (b) The Commission, in its discretion, may deny any application for a permit under this subpart. If an application is denied, the applicant will be notified by letter. The applicant may, within 90 days of the mailing of such letter, request the Commission to reconsider its action.
- (c) Normally, a permit will be issued to expire 1 year after issuance but in no event after the expiration of the license issued to the alien amateur by his government.

§ 97.309 Modification, suspension, or cancellation of permit.

At any time the Commission may, in its discretion, modify, suspend, or cancel any permit issued under this subpart. In this event, the permittee will be notified of the Commission's action by letter mailed to his mailing address in the United States and the permittee shall comply immediately. A permittee may, within 90 days of the mailing of such letter, request the Commission to reconsider its action. The filing of a request for reconsideration shall not stay the effectiveness of that action, but the Commission may stay its action on its own motion.

§ 97.311 Operating conditions.

- (a) The alien amateur may not under any circumstances begin operation until he has received a permit issued by the Commission.
- (b) Operation of an amateur station by an alien amateur under a permit issued by the Commission must comply with all of the following:
- (1) The terms of the bilateral agreement between the alien amateur's government and the government of the United States;
- (2) The provisions of this subpart and of Subparts A through E of this part;

- (3) The operating terms and conditions of the license issued to the alien amateur by his government; and
- (4) Any further conditions specified on the permit issued by the Commission.
- (c) An alien amateur may operate on dates, at locations, or via an itinerary, significantly different from that specified in the application for his permit only under the conditions that he has given advance notice of the particulars of such operation to the Commission in accordance with the requirements of § 97.95(a).

§ 97.313 Station identification.

- (a) The alien amateur shall identify his station as follows:
- (1) Radiotelegraph operation: The amateur shall transmit the call sign issued to him by the licensing country followed by a slant (/) sign and the United States amateur call sign prefix letter(s) and number appropriate to the location of his station.
- (2) Radiotelephone operation: The amateur shall transmit the call sign issued to him by the licensing country followed by the words "fixed", "portable" or "mobile", as appropriate, and the United States amateur call sign prefix letter(s) and number appropriate to the location of his station. The identification shall be made in the English language.
- (b) At least once during each contact with another amateur station, the alien amateur shall indicate, in English, the geographical location of his station as nearly as possible by city and State, commonwealth, or possession.

SUBPART H—[RESERVED]

APPENDICES

APPENDIX 1

EXAMINATION POINTS

Examinations for amateur radio operator licenses are conducted at the Commission's office in Washington, D.C., and at each field office of the Commission on the days designated by the Engineer in Charge of each office. Specific dates should be obtained from the Engineer in Charge of the nearest field office of the Commission.

Examinations are also given at prescribed intervals in the cities listed in the Commission's current Examination Schedule, copies of which are available from the Federal Communications Commission Regional Services Division, Washington, D.C. 20554, or from any one of the Commission's field offices listed in § 0.121.

APPENDIX 2

Extracts From Radio Regulations Annexed to the International Telecommunication Convention (Geneva, 1959)

ARTICLE 41-AMATEUR STATIONS

SECTION 1. Radiocommunications between amateur stations of different countries ¹ shall be forbidden if the administration of one of the countries concerned has notified that it objects to such radiocommunications.

- SEC. 2. (1) When transmissions between amateur stations of different countries are permitted, they shall be made in plain language and shall be limited to messages of a technical nature relating to tests and to remarks of a personal character for which, by reason of their unimportance, recourse to the public telecommunications service is not justified. It is absolutely forbidden for amateur stations to be used for transmitting international communications on behalf of third parties.
- (2) The preceding provisions may be modified by special arrangements between the administration of the countries concerned.
- SEC. 3. (1) Any person operating the apparatus of an amateur station shall have proved that he is able to send correctly by hand and to receive correctly by ear, texts in Morse code signals. Administrations concerned may, however, waive this requirement in the case of stations making use exclusively of frequencies above 144 MHz.
- (2) Administrations shall take such measures as they judge necessary to verify the technical qualifications of any person operating the apparatus of an amateur station.
- SEC. 4. The maximum power of amateur stations shall be fixed by the administrations concerned, having regard to the technical qualifications of the operators and to the conditions under which these stations are to work.
- SEC. 5. (1) All the general rules of the Convention and of these Regulations shall apply to amateur stations. In particular, the emitted frequency shall be as stable and as free from spurious emissions as the state of technical development for such stations permits.
- (2) During the course of their transmissions, amateur stations shall transmit their call sign at short intervals.

RESOLUTION NO. 10

Relating to the use of the bands 7000 to 7100 kHz and 7100 to 7300 kHz by the Amateur Service and the Broadcasting Service.

The Administrative Radio Conference, Geneva, 1959,

Considering-

- (a) That the sharing of frequency bands by amateur, fixed, and broadcasting services is undesirable and should be avoided;
- (b) That it is desirable to have worldwide exclusive allocations for these services in Band 7;
- (c) That the band 7000 to 7100 kHz is allocated on a worldwide basis exclusively to the amateur service;
- (d) That the band 7100 to 7300 kHz is allocated in Regions 1 and 3 to the broadcasting service and in Region 2 to the amateur service;

resolves,

that the broadcasting service should be prohibited from the band 7000 to 7100 kHz and that broadcasting stations operating on frequencies in this band should cease such operation; and noting,

the provisions of No. 117 of the Radio Regulations;

further resolves,

that interregional amateur contacts should be only in the band 7000 to 7100 kHz and that the administrations should make every effort to ensure that the broadcasting service in the band 7100 to 7300 kHz, in Regions 1 and 3, does not cause interference to the amateur service in Region 2; such being consistent with the provisions of No. 117 of the Radio Regulations.

APPENDIX 3

CLASSIFICATION OF EMISSIONS

For convenient reference the tabulation below is extracted from the classification of typical emissions in Part 2 of the Commission's Rules and Regulations and in the Radio Regulations, Geneva, 1959, and it includes only those general classi-

¹ As may appear in public notices issued by the Commission.

fications which appear most applicable to the Amateur Radio Service.

Type of modulation	Type of transmission	Symbol
Amplitude	With no modulation	AØ
	Telegraph without the use of modulating audio frequency (by on-off keying).	A1,
	Telegraphy by the on-off keying of an amplitude modulating audio frequency or audio frequencies or by the on-off keying of the modulated emission (special case: an unkeyed emission amplitude modulated).	A2
	Telephony	A31
	Facsimile	A4
	Television.	A5
Frequency (or phase).	Telegraphy by frequency shift keying without the use of a modulating audio frequency.	F1
	Telegraphy by the on-off keying of a frequency modulating audio fre- quency or by the on-off keying of frequency modulated emission (special case: an unkeyed emission frequency	F2
	modulated). Telephony. Facsimile. Television.	F4 F5
Pulse		P

¹ (In Part 97) unless specified otherwise, A3 includes single and double sideband with full, reduced, or suppressed carrier.

APPENDIX 4

Convention Between the United States of America and Canada, Relating to the Operation by Citizens of Either Country of Certain Radio Equipment or Stations in the Other Country (Effective May 15, 1952)

ARTICLE III

It is agreed that persons holding appropriate amateur licenses issued by either country may operate their amateur stations in the territory of the other country under the following conditions:

(a) Each visiting amateur may be required to register and receive a permit before operating any amateur station licensed by his government.

- (b) The visiting amateur will identify his station by:
- (1) Radiotelegraph operation. The amateur call sign issued to him by the licensing country followed by a slant (/) sign and the amateur call sign prefix and call area number of the country he is visiting.
 - (2) Radiotelephone operation. The amateur call sign in

English issued to him by the licensing country followed by the words, "fixed," "portable" or "mobile," as appropriate, and the amateur call sign prefix and call area number of the country he is visiting.

- (c) Each amateur station shall indicate at least once during each contact with another station its geographical location as nearly as possible by city and state or city and province.
- (d) In other respects the amateur station shall be operated in accordance with the laws and regulations of the country in which the station is temporarily located.

APPENDIX !

DETERMINATION OF ANTENNA HEIGHT ABOVE AVERAGE TERRAIN

The effective height of the transmitting antenna shall be the height of the antenna's center of radiation above "average terrain." For this purpose "effective height" shall be established as follows:

- (a) On a U.S. Geological Survey Map having a scale of 1:250,000, lay out eight evenly spaced radials, extending from the transmitter site to a distance of 10 miles and beginning at (0°, 45°, 90°, 135°, 180°, 225°, 270°, 315° T.) If preferred, maps of greater scale may be used.
- (b) By reference to the map contour lines, establish the ground elevation above mean sea level (AMSL) at 2, 4, 6, 8, and 10 miles from the antenna structure along each radial. If no elevation figure or contour line exists for any particular point, the nearest contour line elevation shall be employed.
- (c) Calculate the arithmetic average of these 40 points of elevation (5 points of each of 8 radials).
- (d) The height above average terrain of the antenna is thus the height AMSL of the antenna's center of radiation, minus the height of average terrain as calculated above.

NOTE 1: Where the transmitter is located near a large body of water, certain points of established elevation may fall over water. Where it is expected that service would be provided to land areas beyond the body of water, the points at water level in that direction should be included in the calculation of average elevation. Where it is expected that service would not be provided to land areas beyond the body of water, the points at water level should not be included in the average.

NOTE 2: In instances in which this procedure might provide unreasonable figures due to the unusual nature of the local terrain, applicant may provide additional data at his own discretion, and such data may be considered if deemed significant.
